REPORT DUE THIS MONTH:

President-Elect Faces Divisive Issue On Question Of A Single Chief Of Staff

In fulfilling his campaign promise to reorganize the Pentagon, President-elect John F. Kennedy will face an explosive issue.

It revolves around the controversial question of whether or not Armed Forces policy-making should be placed under centralized guidance of a single Chief of Staff. Few more divisive issues have ever been raised in connection with the organization of the Defense Establishment.

If the new Chief Executive urges a single Chief of Staff, he will encounter strong opposition from House and Senate leaders—many within the ranks of his own party—who have consistently denounced any move in this direction.

Should he choose to ignore the question, equally vocal advocates of a single Chief of Staff are certain to describe his proposal as "shortsighted."

Of the two courses of action, the latter

is likely to cause less friction and assure a greater chance of success for the new proposals.

Arrayed against a single Chief of Staff

ORDERS INDEX

Official assignment changes announced by the Services are published as follows: Army, Page 4; Navy and Marine Corps, Page 5A; Air Force, Page 7; and Coast Guard, Page 23.

The Air Force orders include hundreds of promotions to permanent lieutenant colonel. The Army this week reported new selections to permanent brigadier general, Page 4 and advancements to other ranks, Page 21.

"GOLD DOLLAR WIDOW" CONFUSION:

It Will Be "The Duration" Again For Thousands In The Services

SERVICE families throughout the Nation this week were preparing for Christmas and reviving a new peacetime balance of payments version of "The Duration," as forced family separations were known in WWII.

While individual families sought to meet unexpected problems involving such matters as housing, schooling, med-

ical care, and separation of husbands and fathers from their wives and children, Pentagon officials were forced to express regrets this week that they still could not provide Service people with specific implementation plans.

Whatever the hopes that President Eisenhower's directive to cut the number of Service dependents overseas by 284,000 would be reviewed on a priority basis by the new Commander-in-Chief after 20 January, Service officials were going forward with actions to slash family travel in accordance with orders.

The Army, Navy, Air Force and Marine Corps did not receive until 25 No-

—Continued on page 17

"We must encourage far larger numbers of qualified Americans to live and work abroad.

"Half a million American civilians live abroad, as a result of private and government employment. Their number and their ability to represent the United States creditably must rise rapidly in the next decade if we are to attain an adequate level of exports and foreign investment and carry out programs for training and technical assistance. Universities, businesses, and the federal government should each in appropriate fields greatly increase language and specialized training for such work."—From The Report of the President's Commission on National Goals (released 28 November 1960).

MATS M/G Waldron Cited For Safe Flying Record

FLYING 5,000 accident-free hours has earned Maj. Gen. Russell L. Waldron, left, Commander of the MATS Western Transport Air Force, a pin, certificate and congratulations from Lt. Gen. Joe W. Kelly, MATS Commander. The pin was presented in General Kelly's office at MATS' worldwide headquarters, Scott AFB, Ill. General Waldron's airlift command stretches from California to Saudi Arabia, halfway around the world.

TWO-STAR SLOT:

Army Atomic And Missile Pioneer Will Get Key AEC Military Applications Post

THE Defense Department and the Atomic Energy Commission will announce shortly the designation of Brig. Gen. Austin W. Betts, an Army atomic and missile pioneer, as AEC Director of Military Applications. He will succeed Maj. Gen. A. D. Starbird, who has held the post since 1955.

General Betts, 48 on 22 November, is a USMA '34 graduate with a Master of Science Degree from M.I.T. in '38. General

Starbird, also 48, is a USMA '33 graduate with a Civil Engineering Degree from Princeton in '38. He was made a major general on 1 January 1956, six months after assuming the AEC post.

A Military Assistant to Dr. Herbert F. York, Director of Defense Research and Engineering, General Betts was assigned to Los Alamos, N.M., in 1945 to work on the nuclear weapons program. At the age

Retired Officers Group Studies Organization Plan Proposed At "Little French Revolution"

L T. GEN. Idwal H. Edwards, USAF-Ret., President of the Retired Officers Association, has appointed an 11-member committee to study ways to give members outside Washington more representation at the operating level of the organization.

The appointments follow what one member described to THE JOURNAL as a "Little French Revolution" at the recent

15th Biennial Convention held in Washington, D. C.

Armed with more than 1,000 proxies, a determined band of members turned the normally routine convention proceedings into probably the liveliest session in the organization's 30-year history. Their avowed object was to make the organization "more democratic and representative of the views of the membership."

The contentions of the insurgents were centered around two principal points:

1) They objected to the practice of being handed the report of the nominating committee and the resolutions committee after they enter the meeting and being

called upon to vote on them without prior study or deliberation.

2) They do not like the idea of most of the officers and directors being from Washington, D. C., or its environs, nor the practice of reelecting most of them year after year, with virtually no voice being given to the members in the field.

When the smoke had cleared, the uprising had brought about the adoption of two significant resolutions which

1) Require that "the President of the Retired Officers Association appoint a Committee to study the question of regional representation on the Board of

MORE RESEARCH SOUGHT:

Presidential Group Stresses Need To Cut Lead Time In Weapons Cycle

A PRESIDENTIAL Commission, declaring that U. S. citizens must be prepared to make "sacrifices" to meet the "rising costs" of military preparedness, has called for "bold and tough-minded management" at the Pentagon to reduce the lead time in bringing new weapons to operational use.

"Conservation of time is critical," the Commission on National Goals, said. "It may be more important than the conservation of funds. Saving time is likely to save money."

"At whatever cost," the Commission said, "we must maintain strategic and tactical forces of sufficient strength to deter the Communist powers from surprise attack and to cope with military aggression even on a limited scale."

Appointed by President Eisenhower last February, the 11-member Commission was assigned the task of developing a broad outline of national objectives and programs for the next decade and longer, and to set up a series of goals in various areas of national activity.

The Commission's report was released 28 November. Here are excerpts from

L/C Dunlap Commands STRAC Signal Battalion

Lt. Col. Robert E. Dunlap has assumed command of the Strategic Army Corp's 69th Signal Battalion at Ft. Meade, Md.

He replaces Lt. Col. Clayton H. Moore, Jr., assigned to the Military Assistance Institute in Arlington, Va., after which he reports in Manila with the Joint U.S. Military Assistance Group.

Maj. Rufus Z. Johnston is 69th Executive Officer.

Col. Baker Named AMC Info Deputy

Brig. Gen. Paul W. Scheidecker, Commander of the Air Force Accounting and Finance Center, Denver, presented the Commendation Medal to Colonel Basil Lee Baker, former Chief of the Directorate of Administration.

He has been assigned as Deputy Director of Information at AMC Headquarters, Wright-Patterson AFB, Ohio.

All Services Represented On Inaugural Committee; Maj. Gen. Gailey Is Chairman

MAJ. Gen. C. K. Gailey, Military District of Washington CG, will serve as Chairman of the Armed Forces Participation Committee for the inauguration of President-elect John F. Kennedy.

Members of General Gailey's Committee include RADM. T. H. Robbins, Commandant of the Potomac River Naval Command; Maj. Gen. Brooke E. Allen, Commander, Headquarters Command, Bolling AFB; RADM. H. J. Wuensch, Coast Guard Chief of Per-

sonnel, and Col. C. J. Bailey, Commanding Officer, Marine Barracks, Washington, D. C.

The Joint Executive Committee is headed by Col. D. B. Miller, Assistant CofS, G-3, MDW, and includes Cdr. T. S. Medford, Navy; Col. C. M. Walton, Air Force; Lt. Col. W. W. Curtis, USMC; Cdr. J. D. Doyle, USCG, and Capt. J. T. Everett, Maritime.

The work of various subcommittees will be conducted under the direction of the following officers:

Operations — Lt. Col. R. W. Davis, Army.

Logistics — Capt. Bernhard Tieslau, Navy.

Military Aides — Lt. Col. W. F. Doehler, USMC.

Parade — Lt. Col. P. C. Miller, Army; Lt. Col. Norman Wamper, Co-Chairman.

Public Relations — Lt. Col. J. J. Christy, Army; Lt. Col. L. J. Fishkin, Co-Chairman.

Special Events — Capt. J. M. Kipp, Navy.

Transportation — Lt. Col. B. Saunders, USAF.

Seabees Help

Seven Seabees from the Atlantic Fleet Naval Construction Battalions are assisting the Government of Ecuador in building a new naval academy at Salinas.

During WWII, the U. S. Navy established an Advanced Base there, which at one point was occupied by over 5,000 U. S. personnel.

When the base was evacuated, the Navy turned over to the Ecuadorian Armed Forces the existing structures. Since then, Salinas has housed an Army, Air Force and Navy Base, including the present Naval Academy.

Drill Ended

Marine Corps Commandant, General David M. Shoup, has abolished the eight-man drill for Marine Corps use.

The Marine Commandant said that all drills and ceremonies will be conducted thereafter in accordance with the LPM and uncancelled portions of the Marine Corps drill manual. Commanders may, however, still use the eight-man squad drill for special occasions at their options.

Any reduction in training time within recruit depots as the result of shifting to the less complex LPM drill will be applied to other training, General Shoup directed.

AIRBORNE SUB-HUNTERS USE TI ASW SYSTEMS

Five major ASW aircraft

today use antisubmarine warfare systems supplied by Texas Instruments. These include radar, sonar, magnetic anomaly detection, interval computers, intercom, and advanced detection systems. Now, TI is applying its 14-years' antisubmarine experience to newer and better methods for detecting, localizing, classifying and positively identifying both conventional and nuclear-powered submarines.

For detailed information about these special activities, properly cleared personnel with a need to know are invited to contact SERVICE ENGINEERING:

New Army Copter Plans Reported

WHEN the Army selects and goes into production on its proposed new light four-place turbine helicopter, it will have brought military and civilians nearer to the goal of an aircraft in every garage.

So said Brig. Gen. Clifton F. Von Kann, Director of Army Aviation, in an address 29 November to the Aero Club of Washington.

"The specifications of this aircraft," General Von Kann said, "have recently gone to industry and in the next few months the Army will choose two designs to be carried out to prototype stage. After an extensive test of the finished articles, one will be chosen for rather high density production. I think it is safe to forecast that the final item will put the light helicopter in an entirely different utilization category."

The General said that the Army expects ground mobility to be the major means for the next decade, but it does forecast a growing capability for air mobility at every level during the next ten years.

"For example," he added, "we expect every division commander to be able to move at least a company of infantry in one lift with his organic aircraft. In this sense the Army is deadly serious about its air mobility program."

General Von Kann said that he earnestly hopes that the recently imposed ceiling on the total number of pilots will be a temporary measure "because, if it is not, it has the effect of stalemating the Army's efforts in air mobility."

The present restrictions on weight of aircraft, General Von Kann declared have outdated their original purpose.

"There will be no fixed wing aircraft procured by the Army in the foreseeable future that will not weigh more than 5,000 pounds, and any aerial crane development may well exceed the 20,000 pound limitation on helicopters," he said.

Army officials have asked Secretary of Defense Gates to take a new look at the aircraft limitations and on the range and weight of missiles. The Army is the only Service which operates under such weapons ceilings.

Vietnam To Ft. Lee For Col. Dunlap; Col. Morrison At Norton From Turkey

Col. Nicholas Dunlap, for the past 14 months Operations Officer of Logistical Activities, MAAG, Vietnam, has become G-4 of the QM Training Command at Ft. Lee, Va.

Col. Albert M. Morrison, reporting from Turkey, has joined the Materiel Inspection Division of the Directorate of Readiness Inspection, USAF Deputy

I.G. for Inspection, Norton AFB, Calif. Colonel Morrison and his wife, the former Hazel Perry, reside at 3293 Redwood Drive, Riverside, Calif., with their daughter, Marlana, who was born there in 1944.

Lt. Col. Raymond J. Caldbeck, Commander of the 428th Medical Battalion of the Army Infantry Center at Ft.

Army Navy Air Force Journal 3
3 Dec. 1960 (Vol. 98, P. 371)

Benning, Ga., has been awarded a Certificate of Achievement for recent outstanding service with the 549th Hospital Center in Heidelberg, Germany.

Col. Lloyd R. Salisbury, USMA '41, has been appointed G-1 at the Army Intelligence Center and Ft. Holabird, Md., after duty with Allied Forces Southern Europe in Naples, as Deputy Assistant CofS for Personnel. He is married to the former Wilma Thompson.

*Bell Telephone engineers are putting
together the nervous system for BMEWS
... Ballistic Missile Early Warning System*

The eyes of the U. S. Air Force BMEWS will be massive, far-seeing radars located in Alaska, Greenland and Great Britain. The brain is at the Continental Air Defense Center in Colorado Springs. Between the eyes and the brain there will be a vast network to provide instantaneous, highly reliable communications in the event of enemy missile attack.

The Bell System's manufacturing and supply unit, Western Electric, heads a team of 30 private firms and government agencies from three countries which is constructing this communications system.

Work is going ahead at full speed, right on schedule. All of the arts of long distance communications

are being used to conquer the stern, hard-bitten terrain of BMEWS—line-of-sight and over-the-horizon radio, cables on land and under water.

Several forms of transmission are being employed. Newly designed high-speed data channels will feed information to the BMEWS computers. Voice and teletypewriter links will also be available.

One important reason the Bell System was given this assignment was its demonstrated capacity to handle such a challenging task. The resourcefulness and skill shown in this and other defense projects are significant assets contributing to our country's readiness.

BELL TELEPHONE SYSTEM

Ordnance Col. Harrison Decorated At Letterman

COL. Leander H. Harrison, 132 Rishell Avenue, Oakland, Calif., former Commander of the San Francisco Ordnance District, received the Legion of Merit, (Oak Leaf Cluster), from Maj. Gen. Bertram A. Holtzworth, Sixth Army CofS, at an informal ceremony held in Letterman General Hospital, Presidio of San Francisco, where Colonel Harrison is a patient.

The citation took special note of Colonel Harrison's dynamic leadership during his year-long tenure as commander of the San Francisco Ordnance District. His skillful management and resourcefulness advanced engineer services leading to the development and subsequent production of the M-113 Aluminum Armored Personnel Carrier, conduct of a classified research program at Stanford Research Institute concerning the air defense of the United States, and the production of an improved rocket engine for the HAWK antiaircraft missile.

"In the face of a serious threat to his health, and without regard for his personal welfare, Colonel Harrison's contributions made increased improvements in the economy and effectiveness of the procurement effort," the citation said.

Members of the Colonel's family present to witness the presentation of the medal were his wife; their daughter, Patricia Ann; son, Charles B. Harrison, and his wife, and Mrs. Harrison's mother, Mrs. Marjorie R. Stuart.

Army Chooses 30 For Regular B/G

(Other Promotions, Page 23)

An Army selection board has chosen Chaplain William J. Moran and 29 other Regular colonels for permanent promotion to brigadier general as vacancies occur.

Here is the seniority status of the line officers:

Davis, John J. Snodgrass, John T. Power, George W. Gerhardt, H. A. Manhart, Ashton H. Pugh, John R. Timmes, Charles J. Allen, Irvin L. Sibley, Alden K. Lincoln, L. J. Honeycutt, John T. "REVERSE TREND"

A. M. A. Seeks School Slots For Doctors

THE American Medical Association will urge the incoming Secretary of Defense to order increased participation of medical officers in senior Service school courses.

In a report adopted by the House of Delegates 30 November in Washington, D. C., the Association urged "an effective program to enable qualified senior medical officers (physicians) of the Regular Service, the Ready Reserve, and the National Guard to attend the courses of instruction at the National War College, the Industrial College of the Armed Forces, the Joint Armed Forces Staff College and the Services' War, Staff and Command, and General Staff Schools. . . ."

Such action is necessary, the AMA said, "in order to reverse a trend that has developed. The Association says that in recent years the Department of Defense and the Armed Forces have assigned few medical officers to the student bodies of the advanced schools and colleges of the Armed Forces."

"This trend may well cause a void in the succession of properly trained senior medical staff officers for duty with Unified and Specified Commands and their Component Commands, as well as in other responsible positions," the AMA said.

The Association praised recent DoD action which ordered medical representation on the staff of the U. S. joint and specified commands.

Following its past policy, the Association again urged medical representation on the JCS Joint Staff.

Strength Up

The Armed Forces began last month a strength of 2,502,145, an increase of 10,108 from the previous month.

Army strength at last report was 881,115; Navy, 628,362; Marine Corps, 176,948; Air Force, 815,720.

President's Dr.

Maj. Gen. Howard McC. Snyder, USA-Ret., Personal Physician to President Eisenhower, was honored "for a lifetime of distinguished service to humanity" by the American Medical Association's House of Delegates 28 November during their annual clinical meeting in Washington, D. C.

General Snyder, 79, retired from active duty in 1948, but was recalled to serve with General Eisenhower's SHAPE Headquarters in Paris in 1951. He has been on continuous active duty at the White House since 1953.

Transportation Corps Dedicates Chapel

The Memorial Chapel of the Transportation Corps, said to be the only such chapel established by a corps or branch of the Army, was dedicated 27 November at Ft. Eustis, Va.

Maj. Gen. Frank S. Besson, jr., Chief of Transportation, and Maj. Gen. Frank A. Tobey, Chief of Chaplains, headed the list of Army dignitaries participating.

Present were two former Ft. Eustis Commanding Generals beside General Besson. They are Maj. Gen. A. H. Sunderland, USA-Ret., who commanded the then Camp Eustis in 1918-19, and Brig. Gen. Harold R. Duffie, USA-Ret., CG from 1951 to 1953. Honor guests also included a former Post Chaplain, Lt. Col. Edward W. Eanes, USA-Ret.

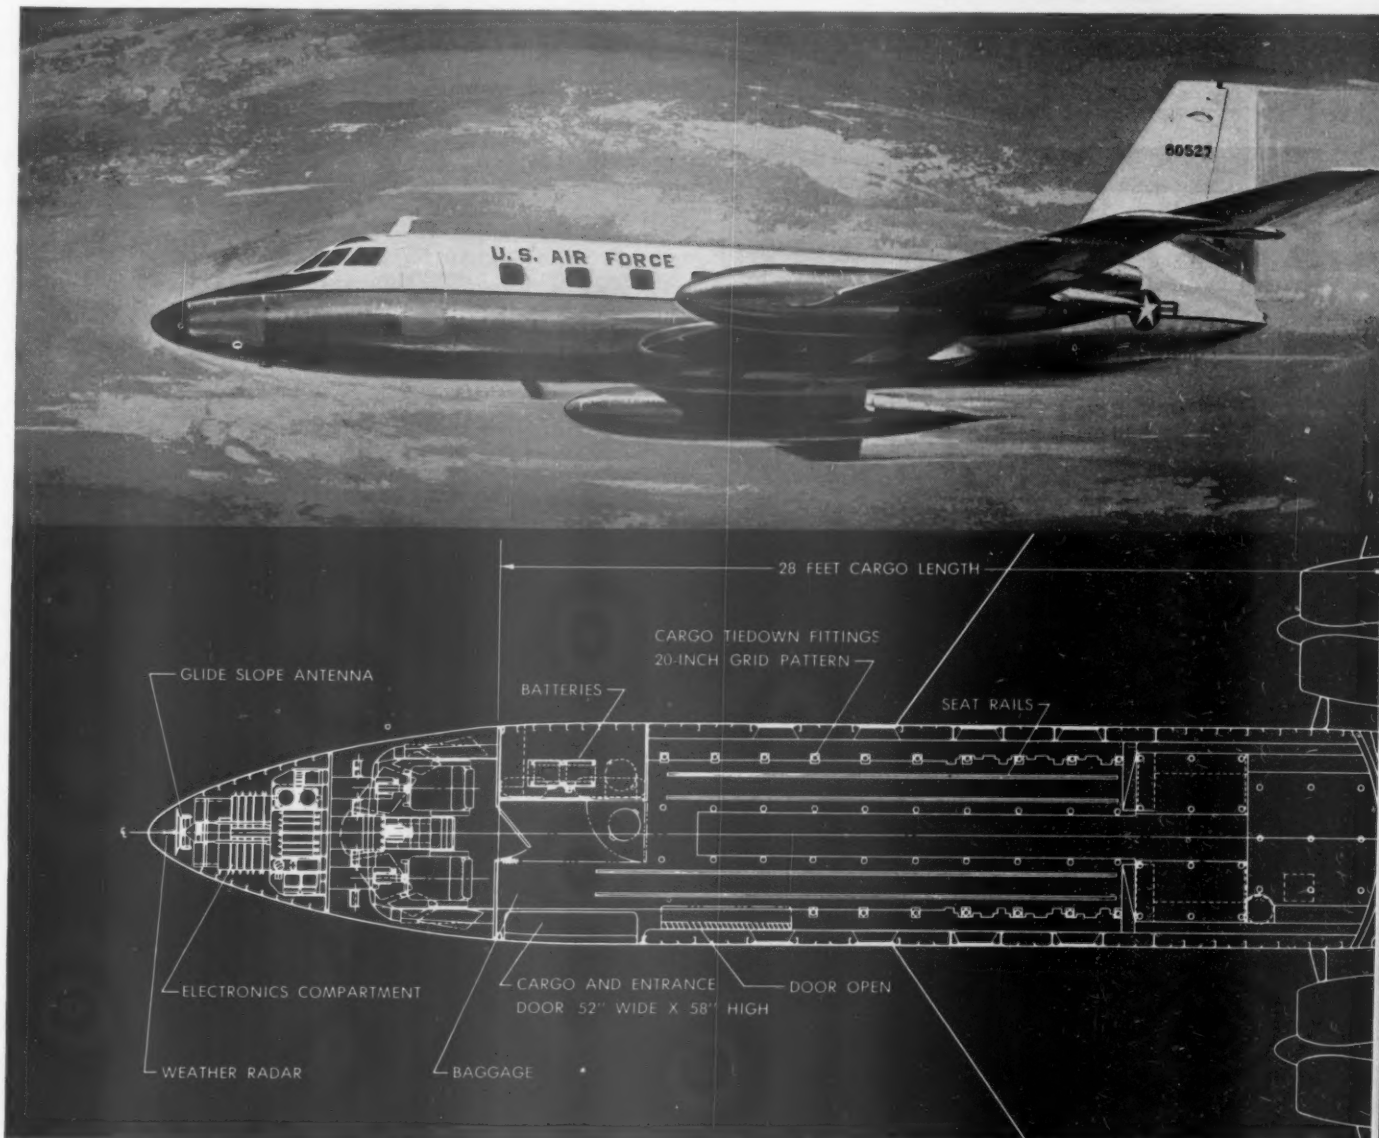

Army Navy Air Force Journal

5

Coordinator To Korea

Brig. Gen. Hamilton A. Twitchell, Chief of the Coordination Group, Office of the Army CofS, will be assigned to the Eighth Army, Korea, in January.

Brig. Gen. James O. Curtis, jr., until recently SHAPE Secretary of the Staff, retired 30 November after more than 30 years service.

UTILIZATION

The Lockheed C-140 JetStar's high speed and long-range capability give it a much higher rate of productivity for mission support than aircraft now in service. The C-140 is versatile: its pressurized cargo compartment provides flexible arrangements to transport passengers, priority cargo, or specialized equipment. And the C-140 is economical: the modernization of mission support fleets—by replacing obsolete aircraft with JetStars—can save millions of operational dollars.

91.86% SELECTED:

Navy Will Promote 1049 To Lieutenant Commander; Aviators Are Dominant

(Names, Page 22)

Aviators topped the field in the Navy's 1961 selection of 1,049 lieutenants for lieutenant commander.

Of those chosen, 486 were aviators, 441 other Unrestricted Line officers, 50 LDOs and 72 Restricted Line officers.

There were 116 officers selected from above the zone, 903 from 983 eligible within the zone, and 30 officers chosen from below the zone.

The percentage of selection within the zone was 91.86%.

Highest percentage selection rate went to the Restricted Line, 98.44% of the eligibles within the zone. All of the Restricted officers within the zone, with the

exception of one legal officer, were chosen. Of the 50 LDOs in the zone, 48 officers were selected.

Within the zone also, 91% of the Naval aviators were chosen, as compared with 90.3% of the remainder of the Unrestricted Line.

Only one officer within the zone was selected for separation.

Below the zone selections included 10 aviators, 16 other Unrestricted Line officers, 2 Engineering Duty Officers (General), one legal officer and one intelligence officer.

Following is a breakdown by designator of the in zone and above the zone selections. The Unrestricted Line is divided into USN, USN-Temporary, and USNR.

UNRESTRICTED LINE	SENIOR TO THE PROMOTION ZONE			IN THE PROMOTION ZONE

ADT AUTOMATIC SECURITY SERVICES

The use of approved and properly designed security systems is now a recognized standard in safeguarding our nation's security installations.

Automatic intrusion detection systems are designed to safeguard huge outdoor areas or a single room.

TELAPPROACH SYSTEM:

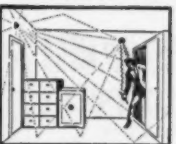

Electronic devices detect intruders who enter an electromagnetic field set up by antennas surrounding a restricted area.

INVISIBLE RAY SYSTEM:

Photoelectric devices detect intruders who intercept an invisible beam of light.

ULTRASONIC SYSTEM:

High frequency sound waves detect any one walking within a guarded area, and give an automatic alarm.

For more details on these and other types of security systems, phone the ADT office listed in your directory or write our executive office in New York.

New Deputy CG Joins Fifth Army Headquarters

MAJ. Gen. Lloyd R. Moses, right, has assumed the post of Fifth Army Deputy CG, where he succeeded Maj. Gen. William S. Biddle, USA-Ret. Reporting from command of the 8th Infantry Division in Germany, General Moses was welcomed by Lt. Gen. William H. Arnold, Fifth Army CG, left.

Col. Harrington Is AF Depot Deputy

Col. George E. Harrington of AMC Headquarters, Wright-Patterson AFB, Ohio, has been named Deputy Commander of Dayton Air Force Depot.

He succeeds Col. William W. Veal, new Depot Commander.

Colonel Harrington has been assigned to AMC since September 1959 as Chief of Industrial Engineering and Operations Division in the Directorate of Supply. Last Spring he was monitor of the Air Force's Project Count that involved a fence-to-fence inventory of all material world-wide.

Colonel Harrington is married to the former Rosemary C. Mawhinney of Washington, D. C. They have two daughters.

Col. Jackson Heads Infantry School Ops

Col. John W. Jackson is the new Operation Officer of the Army Infantry School at Ft. Benning, Ga.

He succeeds Col. Daniel B. Porter, jr., assigned to the Army Training Center at Ft. Knox, Ky.

Colonel Jackson, a June graduate of the Army War College at Carlisle Barracks, Pa., has served in The Infantry School's Command and Staff Department and as Deputy Operations Officer.

Signal Corps Colonel Wins Army Commendation

Col. John Clapper, jr., Chief Army Radio Frequency Engineering Office, has been awarded the Army Commendation Ribbon with Medal Pendant for "meritorious service to the United States in a position of great responsibility from 13 May 1957, to 7 July 1960, as Chief, Operations and Requirements Branch, for the Assistant Chief of Staff for Communications and Electronics, Staff, Commander-in-Chief Pacific."

Colonel Clapper and his wife, Esther, reside at 653 Sleepy Hollow Road, Falls Church, Va. with their son John, III, 15. Their daughter, Karen Elizabeth, 18, attends Stanford University.

COLONEL JOSLIN HEADS COMMUNICATIONS

COL. W. D. Joslin, former Fourth Army Signal Officer at Ft. Sam Houston, Tex., has been appointed Chief of the Army Communications Systems Division of the Office of the Chief Signal Officer.

He and his wife, Helen, live at 719 Moly Drive, Falls Church, Va., with three children: Laurie, Michael and Robin Joslin. Their son, John, is a student at St. Mary's University, San Antonio.

Col. Joslin was an operating engineer with the Arkansas Utilities Company from 1935 to 1941. He attended Arkansas State College and holds a BS degree from the University of Maryland. He is a graduate of the Army Command and General Staff College, the Armed Forces Staff College and the Army War College.

Comptroller Clarifies Navy Allowances For Travel And Lodging Allowances

Comptroller General Joseph Campbell has clarified the rules under which travel, per diem and temporary lodging allowances may be paid to Navy personnel ordered to duty on ships homeported outside the United States.

Under the rules, detailed in Decision B-143587:

- Station allowances begin upon arrival of dependents
- The Service member's entitlement to travel per diem allowances continues until he reports aboard ship
- When receiving travel and temporary lodging allowances at the same times, the temporary lodging allowances must be reduced by that part of the lodging allowance which is applicable to the member himself.

These rules will hold even if the Service member performs temporary duty at the overseas home port prior to reporting aboard his ship.

Mr. Campbell also said that when detached from an overseas shore station, a member will continue to receive cost of living allowances until the day prior to his departure from the area, even if he is performing temporary duty, completing transportation arrangements, on leave, or is kept in the "limits of his home station" due to delays in the departure of scheduled transportation. Temporary lodging allowances in such cases, are limited to 10 days prior to the time of departure.

Such a member would not be entitled to station allowances if he were assigned to temporary duty nearby but outside "the limits of his home station" prior to departure.

Upon being detached from a ship homeported outside the U.S., Service members lose entitlement to station allowances, even for periods of temporary duty in the area of the home port. They might collect travel per diem in such circumstances, Mr. Campbell says.

NAVAL RESERVISTS:

Lucky 13 Win Admiral Rank

The Navy has named 13 Reserve Captains for promotion to Rear Admiral.

Capt. William C. Hughes, Commander, Reserve Destroyer Squadron Two, was the only officer selected who is currently on extended active duty.

The remaining officers selected, their home address and reserve affiliation are:

Leonard S. Bailey, 672 South Highland Avenue, Merion Station, Pa., Naval Reserve Officer School 4-1.

Robert H. Barnum, 110 Round Hill Road, Scarsdale, N. Y., Naval Reserve Intelligence Division 3-1.

Harry R. Canady, 1651 Jane Street, Wantagh, N. Y., Air Wing Staff 83 (Liaison), NAS, N. Y., Brooklyn.

Ralph G. Coburn, jr., Guard Hill Road, Mount Kisco, N. Y., Commander, Naval Reserve Destroyer Escort Division, Third Naval District.

Robert W. Copeland, 1220 North 5th Street, Tacoma, Wash., Submarine Division 13-6.

James D. Hardy, 5 West Newfield Way, Pa., Naval Reserve Research Unit 4-2.

Harry H. Hess, 150 Fitz Randolph Road, Princeton, N. J., Naval Reserve Research Unit 4-1.

William C. Hughes, Commander, Reserve Destroyer Squadron Two, FPO, N. Y.

Thomas J. Killian, 3900 16th St., N.W., Washington, D. C., Naval Reserve Research Company 5-8.

Eric C. Lambert, 670 Blackthorn Road, Winnetka, Ill., Naval Reserve Public Relations Company 9-2.

William M. McCloy, 208 West 8th Street, Los Angeles 14, California, Mobilization Team Division 11-5.

Leslie L. Reid, 2238 Prairie St., Glenview, Illinois, Air Wing Staff 72 (Liaison).

Carl E. Watson, 468 Carlston Street, Richmond, Calif., Naval Reserve Ordnance Company 12-2.

L/C Howard Will Head SAGE Division Info

Lt. Col. James P. Howard has reported for duty as Chief, Office of Information in Headquarters, 33d Air Division (SAGE) at Richards-Gebaur AFB, Mo.

He was formerly Commander of the 72d ACW Squadron at Zapata AFS, Tex.

Marines Extended On Active Duty

The following Marine Corps officers have been extended on active duty to the dates indicated:

First Lieutenant

Murphree, James W., jr., June 61; Sullivan, Paul E., Aug 61; Poepsel, Harvey B., June 61; Charles, Robert S., DuPont, Delbert H., Whaley Robert G., Dec 62.

Second Lieutenant

Eisenson, Henry L., Dec 62; Hansen, Dawson P., Losey, James L., Owens, Terry D., Dec 62; and Stepick, Richard J., Apr 62.

National Security Agency Chief Retires; Col. Gahl Joins Targeting Agency

Dudley C. Sharp—Secretary of the Air Force
Joseph V. Charyk—Under Secretary of the Air Force

 Rancy, Arthur J, Eglin AFB, to Mil Tng Cen, ATC, Lackland AFB.

Col. Cody Heads 3d "Space" Wing

The Vandenberg Field Office of ARDC's Ballistic Missile Division has become the 6565th Test Wing, the third Wing in the Air Force's space and missile program, it is announced by Maj. Gen. O. J. Ritland, AFBMD Commander.

He said that added responsibilities for testing the various ballistic missile launching systems and space programs plus the importance of the mission were major factors in forming the Wing which will give AFBMD a "blue suit" test and evaluation capability for missile and space launches. It will also furnish continuous technical assistance to SAC in training crews at Vandenberg.

Former Field Office Commander, Col. Joseph J. Cody, jr., will head the new organization.

The Wing is made up of four directorates: Personnel and Training, Plans and Operations, Materiel and Technical Support and Facilities Engineering. There will also be a deputy commander for space launches and one for ballistic missiles systems.

Site Activation, Military Test and Evaluation and Space launch operations are the three main responsibilities of the 6565th Wing.

For space booster operations the 6596th Instrumentation Squadron, a unit of the 6594th Test Wing (Satellite) in Sunnyvale, Calif., will play a dual role. It is a part of the launch base operation during vehicle checkout, readiness attainment and launch operations through orbit injection. It also becomes an integral part of a larger command and control net after the vehicle is in orbit. The requirement for a single ARDC organization will also attach the 6594th Launch Squadron to the 6565th Wing for operational control prior to and during launch.

Additional personnel will be assigned to the 6565th Test Wing to assure that the organization will be properly manned in order to carry out its mission in the Air Force's ballistic missile and space programs.

WHAT AN IMPROVEMENT IN RADAR PERFORMANCE!

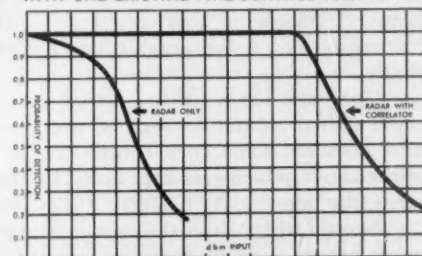

This new Video Correlator is now available as a plug-in unit for fire-control and search radars both airborne and ground-based. Flight and laboratory tests have proved that this compact, 0.3 cubic foot radar augmentation device: • makes target detection certain • serves as an effective counter-countermeasure • reduces

interference from other radars • eliminates external and self-generated radar noise.

Vought Electronics designed the unit for easy back-fitting into existing systems. It contains its own power supply and requires only a simple rigid mounting somewhere in the aircraft.

HERE'S HOW VOUGHT ELECTRONICS' VIDEO CORRELATOR INCREASES THE PROBABILITY OF DETECTION WITH ONE EXISTING FIRE-CONTROL RADAR

FOR FURTHER DETAILS ON ANY ONE OF THE MANY APPLICATIONS OF THIS RADAR ENHANCEMENT DEVICE, WRITE:

Uncertainty Is Key Word In Service Family Outlook

More than two weeks have passed since the President issued his directive ordering the reduction of Service families overseas and the Department of Defense has not yet laid down specific plans and policies which can serve to guide families now under overseas orders or those families abroad whose tours may be cut short.

It will be recalled that President Eisenhower in explaining his action to newsmen at Augusta, Ga., stated that the order had been "tightly reasoned" and that it had been "prepared carefully over a good many days and weeks." One can only conclude that this period of preparation did not include consultation with the Pentagon which seemingly was taken so unaware that it will be a month—15 December—before the Department of Defense will be able to provide the military departments with their total and monthly objectives.

The Defense Department's preliminary memorandum states that "Reductions of dependents will be effected impartially throughout the grade and ranks of military and civilian personnel insofar as possible," but the manner of carrying out this policy has not yet been determined.

In this period of uncertainty, there is one sure outlook—there will be hardships to be faced by thousands of Service families and many problems which they had not anticipated when they decided upon careers in the Armed Forces. It is said that provision will be made for the granting of exceptions in hardship cases. This will necessitate the setting up of some sort of machinery to adjudicate cases and make recommendations for exceptions. Separation will be particularly difficult in the enlisted grades and will impose heavier responsibilities upon the American Red Cross which acts as liaison between the military and families separated from their sponsors when sickness or financial difficulties strike.

The Department's memorandum states that the reduction in dependents abroad will be made "without diminishing our effective military strength." To assume that this can be achieved is the height of optimism, for there are few in the military services who doubt that the reduction will be a blow to morale in all ranks and grades. And lowered morale can not help but be reflected in a lowered military effectiveness.

Strengthening The Retired Officers Association

We hope that the good work the Retired Officers Association has been doing over the years will be intensified as the result of the demand by members outside of Washington, D. C., that they be given proportionate representation on the organization's governing body (see story on first page).

The need for concerted action by retired officers is evident by the rapid growth of the Association over recent years to the point where it now numbers some 46,000 members. In its early days, it was a small organization which was kept going by the vigor and sincerity of its president, the late Col. A. T. Marix, USMC-Ret., who ran it from his home in Van Nuys, Calif. But as the retired lists grew, the need for representation grew and its headquarters was brought to Washington, D. C. Quite naturally it was more convenient to have officers and board members who resided near the headquarters.

Today some of the regional chapters are larger than was the earlier entire association. The Virginia Retired Officers Association, for example, which includes some who are not members of the ROA, has 1,700 members. Because of their size and the intensity of their activity, these regional groups now are demanding representation on the Association's Board. They feel that such representation would strengthen their national association, increase its membership and make its work more effective.

With the present situation whereby two men having the same type and length of service draw different retired pay, there is need for the strongest possible retired officer representation. THE JOURNAL hopes that they will be successful in arousing support of pay equalization early in the next Congress. THE JOURNAL, most certainly, will continue to give this project the same staunch and alert support it has in the past.

READERS' VIEWS:

Travel Directive, Promotions, Accrual Pay Draw Comment

Re: Separation of families

■ It appears that we in the military must be:

- 1st in War
- 1st in Death
- 1st in Dislocated Homes
- 1st in Economic Sacrifice
- 1st in Tragic Separation of Families
- 1st in the Defense of our Country

BUT

Last in Humane Considerations

Last in Pay Raises

COLONEL, USA

Biggest Blow to Morale

■ I have just read the decision to restrict dependents of Service personnel from travelling to some overseas assignments with their husbands.

I am the wife of an active duty serviceman and we have been married for twenty years. My husband has 24½ years continuous service. He has had three overseas assignments—one before World War II—one during World War II—and one after the war. At the present time, although no orders have been issued, he has been advised he would be assigned to Europe and would probably depart in July 1961. His overseas assignment after the war was one where dependents could not go. Now, I find that I am to be left in the States again. At this stage of our life, at our age, I find this an intolerable situation.

Secretary Gates was quoted as saying "there would be no lowering of morale." As far as I am concerned, and I am sure that as far as many, many service wives and families are concerned, this will prove to be the biggest blow to morale that the Services have ever suffered.

I am thinking of myself, naturally, but I am also thinking of families who have small children. We have two boys—one a freshman in college, and the other a senior in high school. I was left with our boys twice during my husband's tours overseas, and I know how much children, and especially boys, need their fathers during their early years. The father's discipline in these formative years is woefully needed.

This single act will do more to decrease service attractiveness and hasten retirements of trained personnel than anything else. There are many other ways to halt the flow of gold from the United States without jeopardizing the family life of our Service personnel.

I also might add that I have never been overseas.

SERVICE WIFE

A Marine Writes About Retired Ranks and Families O'Seas

■ Since Congress passed the act prohibiting "Tombstone" promotions with no pay increase for Naval and Marine Corps officers, it has been my habit to read all service retirements information, contained in THE JOURNAL. As I read, more and more do I become confused, because of the apparent inequi-

ties and discrimination against the U.S. Naval Service.

In the latest to arrive issue of THE JOURNAL, dated 26 November 1960, the following headline on page 8 struck me, "Former Chaplain Chief Retires as Colonel. Then is Promoted to Major General." This is a good deal, how is it accomplished? Is pay involved?

But to really guild the lily, I turned to page 20, same issue, and the first "Promotion" I noted was a Sergeant receiving the rank of Lieutenant Colonel on retirement; a Corporal advancing to Major; Sergeants First Class to Lieutenant Colonel ad infinitum. These I do not understand and would like to have the circumstances surrounding promotions of this magnitude explained. I am sure that thousands of Naval and Marine officers would too, like to know of a way in which they could jump from Ensign/Second Lieutenant to field grade rank, with, I presume, pay privilege on retirement.

A further comment on the recent Presidential Order curtailing dependents in overseas billets, it seems to me that any military organization which has been assigned a tactical function in case of war, is better able to prepare for their assignment overseas without dependents, than with them. We but have to remember the sad state of our armed forces in Japan in 1950, when they were ordered to move to Korea. If memory serves me correctly the stock saying then was "I came to occupy, not fight" this should never again be permitted to happen. What purpose is served by having dependents on Okinawa, it is a forward area, definitely a prime target and better suited for training than vacationing.

NAVAL AND MARINE CORPS RESERVE
TRAINING CENTER
211 CASS STREET, SPRINGFIELD, MASS.

"Gold Dollar Widows" Will Be "Wives"

Congratulations to THE JOURNAL for the most comprehensive coverage of what you call the "Gold Dollar Widow" story (26 November).

Speaking for many here at the Infantry Center, let me tell you that unless this policy is changed, there are going to be a number of us who are going to stay "wives" and not "widows." Unless the State Department takes away our passports, we plan to go overseas at our own expense and live on the economy.

NO STAY AT HOME

Army L/C Answers AF L/C

■ Reference is made to the letter of Lt. Col. (Raymond D.) Lancaster, USAF in the 26 November 1960 issue. I refer him to the issue of 5 March 1960 in which he will find a signed letter questioning hazardous hazard pay by the undersigned.

IN THE JOURNAL

Korea Combat Pay Urged; Curtiss Will Give Free Flight Training; Civilians Are Court-Martialed

10 Years Ago—Steadily rising casualty lists, horrible weather conditions and finally the intervention of the Chinese Communists this week reemphasized Congressional interest in passage of legislation providing combat pay for ground force troops and other Armed Forces personnel in action against the enemy in Korea.

50 Years Ago—Glenn Curtiss, the aviator, has made a formal proposal to the War and Navy Departments to instruct a number of officers who may be detailed for the purpose in aviation without expense to the Government.

97 Years Ago—Two more contractors have been brought to grief. . . They were proved guilty of fraudulent conduct by a court-martial assembled in Cincinnati, Ohio, and sentenced, the one to be imprisoned for six months and to pay a fine of ten thousand dollars; the other to be imprisoned for one year and to pay a fine of twenty thousand dollars, and if this fine is not paid at the expiration of said imprisonment, to be imprisoned until it is paid.

Army's OSWAC Manages \$500 Million Mission To Pack Nuclear Punch In Weapons

by

MAJ. GEN. W. K. GHORMLEY, USA
Commanding General

Ordnance Corps Special Weapons-Ammunition Command

THE U. S. Army Ordnance Special Weapons-Ammunition Command (OSWAC) is the organization that puts the wallop in the Army's punch. It is responsible for the complete life cycle of all nuclear weapons and ammunition for the Army.*

OSWAC is composed of the Headquarters, located at Picatinny Arsenal, Dover, N. J.; Picatinny Arsenal; the Ordnance Ammunition Command, with its Headquarters at Joliet, Ill.; and the Ordnance Liaison Office at Sandia Base, Albuquerque, N. M.

OSWAC, which manages a \$500 million a year business handles the "whole ball of wax" on nuclear weapons and ammunition from research and engineering through procurement, production, distribution, and maintenance. Research and engineering operations are conducted by Picatinny Arsenal, the Research and Engineering Center for the Command. Procurement, production, distribution, and maintenance are conducted by the Ordnance Ammunition Command. The Ordnance Liaison Office maintains liaison between AEC, Defense Atomic Support Agency field installations and the Ordnance Corps at Sandia Base.

Each project must be put through nine distinct stages or phases of operation. These are:

1. Feasibility or Operational Research
2. Concept Study and Design
3. Development
4. Evaluation
5. User and Troop
6. Preproduction Evaluation (Pilot Lot Fabrication)
7. Production
8. Field Service
9. Stockpile Reliability

In the feasibility stage, the military requirements of the weapon are analyzed as to the technical state of art and ability to meet requirements along with the demands that its development will make on the laboratory in the way of cost, personnel, and facilities. These studies use operational research techniques—scientific methods applied to complex managerial or operational problems.

The design study phase begins then. A thorough literature search is made in the various engineering sciences such as strength of materials, aerodynamics, fluid dynamics, mechanics, etc. All available technical know-how is drawn upon. Safety and maintainability are not overlooked in the design study. The goal during this phase is a paper design which appears possible and which fulfills all the requirements. A great deal can be done without spending much money since only paper studies based on fundamental engineering sciences are required.

Powerful Air Guns Aid Nuclear Work

The development stage is probably the most trying and difficult of all. Unfortunately, it is very expensive. Every important variable in the design of the proposed item is isolated and every appropriate test possible is performed. This procedure is necessary to save funds on expensive prototypes as well as to obtain statistics on the reliability of the system. Tests are run on the ground and in all simulated environments. These are called "static tests" and require expensive laboratory equipment to perform. The testing devices used include air guns which impart accelerations of the order of 30,000 g's, high speed centrifugal devices, and environmental chambers which cycle the equipment through all ranges of temperature and humidity encountered on the earth. If the models pass the environmental and static tests, a model program is initiated. The model, designed from dynamic similarity studies, usually simulates the larger, more expensive prototype. If the models prove satisfactory, the stage is reached where the large scale prototype is tested. It is expected that this prototype will represent the end item.

It should be emphasized that these development testing programs on the prototype are conducted in such a way as to give as much insight as possible into the fundamental phenomena of the engineering sciences involved in each test. Telemetry provides information on how the missile is functioning during flight. Recovery operations are necessary to complete the data.

Dud Rate Is Calculated

If the prototype proves satisfactory after extensive tests, the evaluation phase is begun. In this phase a sufficient number of the devices are tested to ascertain its reliability. An attempt is made to use pure statistical reasoning which is, however, usually tinted with engineering judgment since costs on a purely statistical basis would be prohibitive. If we were to design a warhead for a missile to have reliability, let us assume, of no more than one dud in 10,000 from a purely statistical approach, it would require the expenditure of 25,000 missiles with success to get the necessary 90% confidence factor. 25,000 missiles—at say \$50,000 each costs more than a billion dollars. With the number of projects now under development, this is impractical. We overcome this economic impasse by combining statistical reasoning with engineering judgment. In the long run we depend mostly on our fundamental scientific know-how to judge whether we have met the requirements accurately, since pure statistics can rarely be used. As a simple case to illustrate the point, assume we require a reliability of no more than one dud in ten, we can use two fuzes; for two fuzes would have a failure rate of $(.1)^2$ or .01. The engineering judgment involved in this case is the fact that we assume the two fuzes were totally independent. However, the engineer must have conducted

*NOTE: Nuclear devices used in nuclear weapons are supplied by the Atomic Energy Commission (AEC).

Maj. Gen. Ghormley

his program in such a way as to prove this.

It becomes obvious that for engineers to perform their tasks in this business, they must be thoroughly grounded in fundamental engineering science. They must also be responsive to requirements of safety, maintainability, and human engineering.

The preproduction evaluation or pilot lot fabrication phase is a very trying one on the part of the item manager since at this time he must start to integrate the activities of R&D and production agencies. In this day of crash programs no development agency has ever finished our complex programs in sufficient time to have a completely documented set of technical data for production agencies to initiate manufacture. As a result, the item manager integrates the R&D and production phase with the pilot procurement phase where the bugs are ironed out of the initial R&D manufacture as well as evolving a suitable technical data package of drawings and specifications which can be used later in quantity production. This concept of preproduction evaluation (pilot lot fabrication) is one of the primary ways of the OSWAC complex meeting stockpile requirements on an expedited and crash basis. The pilot lot fabrication permits the flexibility of the program manager of continuing manufacture without time delays of phasing in a production facility.

Eliminate Human Error Element

If the item has satisfactorily been manufactured in development as well as pilot lot fabrication, a routine production phase may be entered into. The item manager sees to it that the production engineer follows certain ground rules in the exercise of their responsibilities. The production engineer must assure himself that the process by which we are fabricating the items in no way degrades the reliability and he pays particular attention to assure that the process for fabrication is uniform and reproducible without the element of human error. If the production engineer finds there is a product change necessary to reduce costs or increase the reliability of life of the item, he is required to coordinate with the appropriate development engineer to assure himself that the change does not involve functioning properties of the product, and if function is involved, a suitable test program is instituted to prove that the change is satisfactory.

After production when the item enters field service, it is necessary for our maintenance engineer to guarantee the serviceability of the item. The utilization of an item in the field not only requires that the item itself be satisfactory and not degrade in the field, but also that the troops understand how to use the item. This requires that suitable training programs are instituted and that proper manuals are available to the field when the items are delivered. It also requires that necessary spares and repair parts be available for the servicing of the item if necessary.

Item Management Is Successful

As a check on the overall system, the item manager must be assured that there is a suitable reliability program concurrent with the overall phases previously described. Reliability data are built up during the R&D, manufacturing and field service of an item to have a complete history of the reliability of the item at any time and possible degradation in the field. These data are continually fed back into the original design and development group so that any experience gained can be utilized in the development and design of new items. To maintain control over the overall program the item manager uses an OSWAC Product Master Schedule which has detailed checkpoints to prevent slippages.

The item management concept of the OSWAC Headquarters which is a relatively new management tool to guarantee the optimum atomic weapons and ammunition to our Army troops, has already proven effective in many areas.

Col. Peter Heads Ordnance Safety

Col. Richard H. Peter has been named to command the Army Ordnance Field Safety Office at Jeffersonville, Ind.

This office is interested in the safety of all phases of explosives and ammunition manufacture, testing, storage and

transportation, as well as fire prevention, industrial and motor vehicle safety at all Ordnance Corps establishments in the U. S. It also operates the School for Ordnance Safety, offering courses in guided missile, rocket, ammunition, industrial and motor vehicle safety.

MEMO--

WATCH FOR SECDEF GATES to meet with President Eisenhower before leaving 10 December for the NATO meetings in Paris. Purpose of the Pentagon Chief's visit to the White House will be to reclaim a \$41.5 billion fiscal '62 "balanced budget" ceiling that is being sought by Budget Director Maurice Stans.

SERVICE CHIEFS HAVE ADVISED Secretary Gates that rising costs, coupled with increased operational requirements, dictate a budget rise to about \$43.5 billion during the year that starts next 1 July. His hope apparently will be to win approval of a figure at least midway between \$41.5 and \$43.5 billion.

THE ARMED FORCES WILL NEED supplemental appropriations of about \$300 million to cover fiscal '61 expenditures. Biggest reason is a \$200 million pay hike voted for Federal civilian employees. Increased operational costs, covering such items as 2 additional attack carriers and a current Army strength about 10,000 higher than the 870,000 fiscal year-end goal, account for more than \$50 million. Still more millions will be needed to cover travel costs.

THE LAST CONGRESS SLASHED Service travel funds. Emergency measures were being taken to absorb this reduction. The "Gold Dollar Widow" directive has complicated the fiscal difficulty and will offset the action taken by the Services. It is going to cost extra millions of dollars to move families in this fiscal year. The Services had hoped to delay much travel until the next fiscal year, particularly of those families already out of the country.

THE BIGGEST MEETING OF MILITARY CHIEFS in recent years took place last month "at an isolated anchorage in the western Mediterranean." At this session, held aboard the carrier *Saratoga*, VAdm. George W. Anderson, jr., Sixth Fleet Commander, spoke to more than 700 chief petty officers. The Chiefs came from 28 ships and 3 submarines, one of them the atomic pioneer *Nautilus*.

GENERAL THOMAS D. WHITE, Air Force CofS, will be "excused" from flying duties effective 1 January, one of 1183 AF officers with over 20 years rated service who will give up cockpit time because of the Congressional ceiling on rated officers. It could be that if the AF Chief is around San Francisco, he may try his hand again at flying the Goodyear blimp, as he did during the recent Air Force Association convention. Air Force officers sitting at the Top of the Mark and watching the blimp make a leisurely turn about the city had no idea that their boss was flying it.

WOMEN MEMBERS OF THE SERVICE have a much more difficult time establishing dependency status for their relatives than males. Women must prove that because of physical or mental incapacity, their husbands are unable to provide for their own support in order to establish them as dependents. To emphasize the difficulty of establishing such dependency, the Comptroller General has rejected a dependency claim for the husband of an Army Nurse. An Army medical statement had pointed out that "This individual is unable to care for himself at this time because of a mild stroke. It is necessary that there be a responsible person nearby to care for him. . . ." The Comptroller said that the statement did not establish dependency for the purposes of paying quarters allowances.

THE ARMY CofS, General George H. Decker, will advise Congress that shortened tours overseas for thousands of officers and enlisted men, who will not be accompanied by their families, will reduce greatly the effective utilization of available manpower. This will complicate the Army's task of fulfilling its missions with a strength of 870,000. Another manpower problem: the Army and the other Services anticipate that the first half of 1961 will see a significant increase in retirement and resignation requests.

THE RETIRED PAY STUDY ordered by the Senate Armed Services Committee on 20 August—more than three months ago—is proceeding at funereal pace. Although Chairman Richard B. Russell (D-Ga) said he hoped the study could be completed "early in 1961," no contract has yet been awarded to the independent research organization which is to undertake the survey.

THE MEDICARE OFFICE is investigating the possibility of providing civilian medical treatment for retired Service people and their families. On orders from Col. A. H. Ahnfeldt, the Army Surgeon General's IG, the Medicare Office has begun an extensive study of the costs and feasibility of extending the program to include retired families. The study is expected to be completed about 1 January. Medicare Director, Brig. Gen. Floyd L. Wergeland, MC, USA, has gone on record as favoring such a plan.

A BIG COMPLICATING FACTOR in extension of Medicare to the retired group is the sharp rise in Medicare costs that will occur in 1961 as the result of President Eisenhower's directive limiting the number of Service families overseas. An increase of up to \$10 million next year over this year's \$79 million budget is possible.

SPONSORS OF THE MOVEMENT to broaden representation on the Board of the Retired Officers Association (see story page one) contend that the success of the movement to bring about pay equalization depends largely upon workers at the "grass roots" level. Workers in the wards, precincts and election districts must lay the ground work before work at the top can be effective, they say. Hence, they say, leadership in Washington would be strengthened by representation from chapters in the States.

PENTAGON OFFICIALS WHO HAVE COMPLAINED about the inordinate amount of time they must spend testifying before Congressional committees will be hopeful that the House and Senate will recognize the merits of one of the recommendations of the President's Commission on National Goals (see page 1). The Commission said: "Changing times require that the Congress reassess its procedures. Multiple hearings upon the same issue by several committees put an undue burden upon administrative officers and legislators."

CAREER CIVILIANS IN THE DEFENSE DEPARTMENT will be heartened by the Commission's recommendation for a "drastic increase in their compensation." The Presidential advisory group said "The vastly increased demands upon the Federal Government require at the higher levels more public servants equal in competence and imagination to those in private business and the professions."

THE REPORT SAID NOTHING about an increase in pay or allowances for military personnel. There is scarcely any hope for a military pay adjustment in the next session of Congress, but Pentagon officials are hopeful that something can be done to increase quarters allowances to compensate for the rise in the cost of living. Such action was advocated by the Cordiner Committee, but Defense leaders have done nothing up to now to inform Congress and the public at large of the quarters allowance problems. They will be aggravated, of course, by the "Gold Dollar Widow" situation.

ARMY SECRETARY WILBER M. BRUCKER has received scores of letters from Army wives hailing his pledge to do everything he can to "soften the blow" of the "sudden and drastic" action, as Air Force CofS White described it, restricting family travel overseas. A Silver Star winner in WWI for gallantry in action, Secretary Brucker has demonstrated courage at the Pentagon in fighting for (1) a bigger Active Army and a larger National Guard and Reserve than advocated by the Administration; (2) for compulsory ROTC in the face of Budget Bureau opposition; and (3) in tagging the "Gold Dollar Widow" order as a blow to morale and combat effectiveness.

WHERE OTHERS REMAINED SILENT for fear of disturbing Budget Bureau commanders, Secretary Brucker was in the forefront of this year's successful effort on Capitol Hill to gain approval of increased millions for airlift. He also urged and won additional millions for Army modernization.

AT A TIME WHEN NARROW-BRIMMED hats are the uniform of the day among Pentagon civilian men with influence, Secretary Brucker's specially made and oversized headpieces are going to be missed by those who still believe that the Secretaries of the Services should speak their independent minds when the situation requires.

CHURCH LEADERS WILL OPPOSE the separation of Service families. These protests will increase after 1 February. Dr. James P. Wesley of the Morningside Baptist Church in Atlanta, who recently visited Air Force bases in the Pacific, has declared: "It's worth all the money Uncle Sam spends to unite the men and their families." Dr. Wesley said that many Servicemen will "crack up morally" if forced to live apart from their families.

A NAVAL OFFICER will take command of the Iceland Defense Force next summer when the Navy assumes principal responsibility for the operating and servicing of defense installations there. Present Commander is Col. Benjamin G. Willis, USAF.

THE FIFTH ARMY CG IN CHICAGO, Lt. Gen. William H. Arnold, USMA '24, will retire early next year. He will be 60 on 18 January. Among the likely choices for his successor is Lt. Gen. Donald P. Booth, who will be 58 on 21 December. A USMA '26 graduate who served first in the Engineers and at age 42 was made the youngest theater commander of WWII as head of the Persian Gulf Command, General Booth, formerly Deputy CofS for Personnel, has been High Commissioner of the Ryukyus Islands, CG of USARYIS/IX Corps and CINC-PAC Representative in the Ryukyus since 1 May 1958.

THE COMPTROLLER GENERAL HAS REJECTED an Army officer's lone fight to be paid for promotions from the date of rank he was given in each grade. Maj. William Goode, AUS, asked the Comptroller to base his pay as a captain and later as a major from his date of rank. The Comptroller said no. He ruled that pay in each grade cannot begin prior to the date of orders authorizing his promotion. This same situation holds for Air Force officers.

NAVY AND MARINE CORPS OFFICERS, however, can be paid in each grade from their date of rank, which is often months prior to the time they don their new insignia.

ASSIGNMENT OF BRIG. GEN. AUSTIN W. BETTS, as AEC Director of Military Applications (see Page 1) would give the Army two top atomic slots. Maj. Gen. Robert H. Booth, who has been 2d Region CG of the Army Air Defense Command at Ft. Meade, Md., will succeed VAdm. Edward N. Parker, now Deputy Director of the Joint Strategic Targeting Agency at Offutt AFB, Nebr., as Chief of the Defense Atomic Support Agency.

MAAG Duties For Belvoir CE Officers; L/C Kooken, SigC, Goes To Panama

Army Orders

From page 4—

1st Lieutenant

Ramsden, James H, Ft Bragg, to USA Elm MAAG, Cambodia, Phnom Penh.

To USARAD Cen, Ft Bliss

Bailey, Walter M, Larson AFB, Wash.
Miller, Winton A, Larson AFB, Wash.
Upchurch, Thomas J, Ft Sam Houston.

No Officer* Can Afford to be Without the Coverage of USAA Insurance Save on Insurance Costs with USAA!

Claims for accidents, damage and varied losses are in evidence every day—and insurance is needed to protect you and your family against these costly demands including legal and medical expenses.

Away back in 1922 a group of U.S. Armed Forces officers recognized that insurance costs could be a considerable bite in the personal budget. They organized United Services Automobile Association to make automobile insurance available to officers at cost.

Since that time more than \$75 millions of dollars have been returned in dividends and more than 600,000 USAA policies are now in force.

Active and retired officers continue to manage and direct USAA. Selling is done by mail and no commissions are paid.

USAA understands the problems of those in the service. Not only do USAA policyholders* enjoy maximum protection at liberal savings but they are covered in almost every corner of the world where the U.S. Armed Forces serve.** Claims are settled fairly and quickly even in the most remote areas of the world.

Enjoy the protection and savings offered with these USAA policies:

Automobile Insurance

Comprehensive Personal Liability Insurance

Gives protection from the most common claims that might be filed against the insured and members of his family for injury or damage to person or property.

Household Goods and Personal Effects Floater

Insurance protection for personal property and family possessions against fire, transportation, windstorms, other extended hazards, and theft. Covers anywhere in the world at no extra cost.

Enjoy dependable insurance protection at low cost with USAA. Fill in the coupon and get the facts today.

USMA GRADUATE WINS NUCLEAR SOCIETY HONOR

MAJ. John E. Mock, Defense Atomic Support Agency, Washington, D. C., will receive the American Nuclear Society's 1960 Mark Mills Award at the annual meeting in San Francisco this month.

A graduate of Penn State University and the U.S. Military Academy, with graduate degrees from Purdue University, Major Mock was selected for this honor for work contained in the text of PhD Thesis "An Investigation of the Nuclear Properties and Applications of the Rare Gas Clathrate Compounds." This will also be the title of his address to the members of the Society in December.

Major Mock, the son of Dr. and Mrs. D. R. Mock, 1121 20th Ave., Altoona, Pa., received his BS in Chemical Engineering from Penn State in 1944 and graduated in the Class of '47 from West Point as a Second Lieutenant in the Air Force. Major Mock received his Masters Degree in Chemical Engineering from Purdue in 1950 and was assigned to the Wright-Patterson AFB, Ohio, Air Development Center in the Power Plant Laboratory from 1951 to 1954. At this time he was assigned to the Air Technical Intelligence Command with duty in Wiesbaden, Germany. He remained in that position until being assigned to the Defense Atomic Support Agency in 1958.

Maj. Mock, his wife, Jeannette, and their two daughters, Donna Jean, 16, and Susan Jean, 3, reside at 108 James Drive, S.W., Vienna, Va.

Presidential Commission Warns Of Growing Defense Requirements; Cal

From first page—

the report which relate to National Defense effort:

"In the 1960's every American is summoned to extraordinary personal responsibility, sustained effort, and sacrifice. For the nation is in grave danger, threatened by the rulers of one-third of mankind, for whom the state is everything, the individual significant only as he serves the state.

"These rulers seek the 'peace' of a Communist-oriented world, in which freedom is suppressed and the individual permanently subordinated. Supporting their aim are the Soviet Union's great and swiftly growing strength, the industrial and military progress and potential of Red China, a great capacity for political organization and propaganda, and the specious appeal of Communist doctrine to peoples eager for rapid escape from poverty.

"Meanwhile, weapons of cataclysmic power have come into existence. A major nuclear conflict would be a world catastrophe; violence even in or between small nations could involve the great powers and spark the holocaust.

"The Sino-Soviet threat and modern weapons present great dangers; we have equally great opportunities."

Goals At Home

ARTS AND SCIENCES

"In science we should allot a greater proportion of our total effort to basic research, first, to realize fully the rapidly unfolding opportunities to extend still further our understanding of the world, and second, to enrich applied science and technology so essential to the improvement of health, to economic growth, and to military power.

"Today we must give high priority to those aspects of science and technology which will increase our military strength, but for the longer term we should recognize that our creative activities in science and all other fields will be more productive and meaningful if undertaken, not merely to be ahead of some other nation, but to be worthy of ourselves.

"These objectives should govern our civilian space programs and policies. We should be highly selective in our space objectives and unexcelled in their pursuit. Prestige arises from sound accomplishment, not from the merely spectacular, and we must not be driven by nationalistic competition into programs so extravagant as to divert funds and talents from programs of equal or greater importance.

"... We must use available manpower more efficiently. The practice of wasting highly trained people in jobs below their capacity, particularly in some defense-related industries, must be eliminated.

"... We should allot a larger proportion of Federal research and development funds to basic research. The total program of basic research in industry

and other institutions should be increased."

ECONOMIC GROWTH

"Increased reliance on research and improved technology will provide opportunity for American industry to expand its markets by producing new and authentically improved products rather than by too great a dependence on superficial changes in style. To these ends, universities, research institutes, governments, and industries should great-

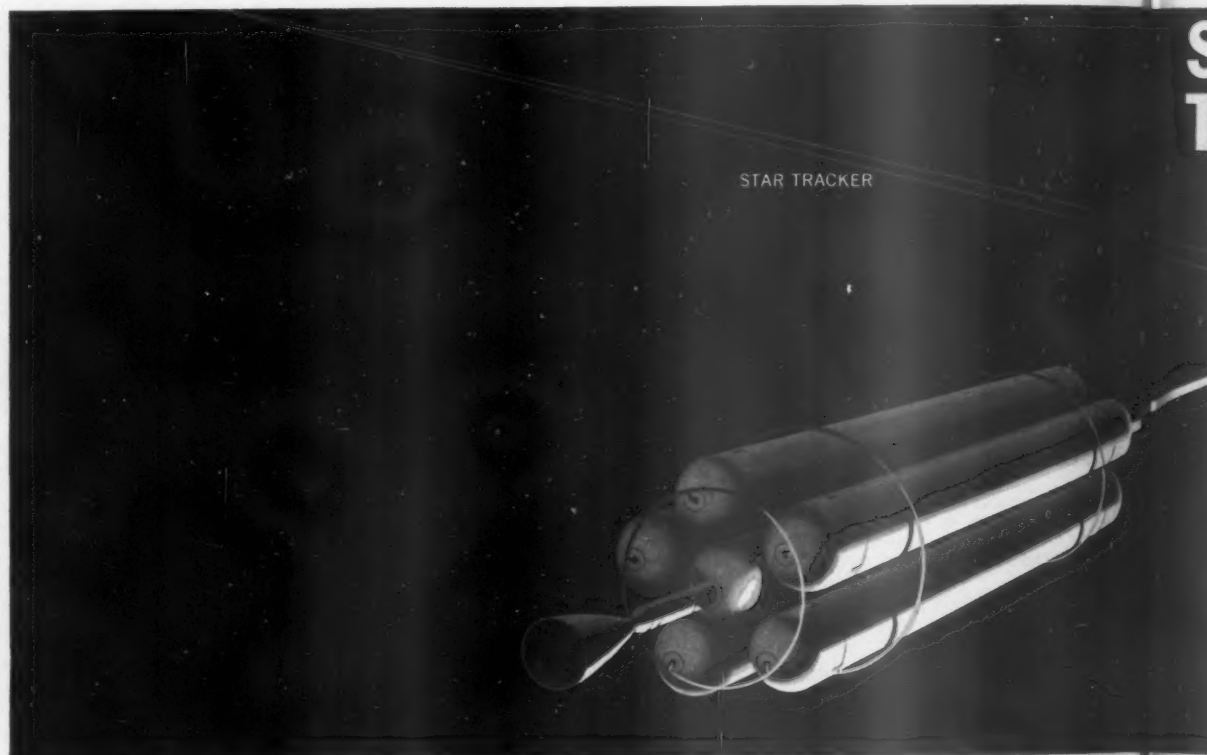

ly increase basic research, the ultimate source of new ideas and new products."

TECHNOLOGICAL CHANGE

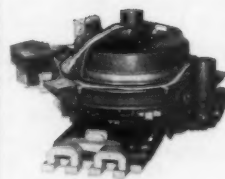

"In our military economy, the Federal Government must strengthen the management of its programs in technology by improving its supervisory and contracting procedures. It must avoid undertaking impracticable and unnecessary projects and thereby wasting scientific and engineering manpower. Both Gov-

ernment and industry need to encourage that combination of engineering and management talent which can master our increasingly complex technology.

"We must continue to adapt the management and organization of the Department of Defense to changing military needs. We must encourage fundamental advances in military technology and their rapid introduction. Through bold and tough-minded management we should reduce lead-time in bringing new weapons to operational use. Civilian and

Calls For "Bold And Tough-Minded" Pentagon Management

military leaders, with the help and understanding of Congress, must make and make stick the difficult inter-service decisions required for the selection of major weapons systems from among available alternatives. The increasing complexity of these systems, the time required for their development, and their fabulous cost give these decisions overriding importance. Conservation of time is critical; it may be more important than the conservation of funds. Saving time is likely to save money.

Goals Abroad

THE SOVIET THREAT

"Communist aggression and subversion threaten all that we seek to do both at home and abroad. Consequently, the maintenance of our independence and way of life, as well as our concern for the freedom of other nations, require the most effective counter-measures.

"The power and opportunities of the Sino-Soviet nations are such that it will

be a major task to prevent their expansion in the coming decade. Nevertheless, we must never lose sight of our ultimate goal: to extend the opportunities for free choice and self-determination throughout the world.

"We must stand firm wherever, as in Berlin, our commitments and interests are squarely opposed to those of the Soviets. At whatever cost, we must maintain strategic and tactical forces of sufficient strength to deter the Communist powers from surprise attack and to cope

with military aggression even on a limited scale. A secure deterrent is essential.

"We must meet Communist military threats used for political purposes. We must be ready to make the sacrifices necessary to meet the rising costs of such military capabilities.

COMMUNIST CHINA

"Communist China's blatant hostility to the United States makes it especially urgent to strengthen our Pacific defenses and our ties with our Pacific allies.

"Over the next decade, Communist China may be more aggressive than the USSR. Within a few years, Peiping may have the capacity to produce atomic weapons. Its strong conventional forces and rapid industrial progress already exert great impact in Asia.

"Our policies in the Far East must include maximum cooperation with Japan in solving its difficult economic problems, continued support for the Republic of Korea and the Government of the Republic of China, programs of military and economic assistance to the free nations of South-East Asia, major assistance toward the economic development of India, and the maintenance of our own military forces.

MILITARY ALLIANCES

"For the common defense, we must maintain and strengthen our military alliances. Our commitment to NATO in particular must remain firm. We should encourage the trend to greater military integration among the European members and the assumption by them of greater responsibilities. Our other military alliances and relationships in the Middle East and Asia must likewise be reaffirmed and strengthened. The Organization of American States must continue to have our unstinting support.

"In support of these alliances, and in a few nations not covered by them, the United States must continue to furnish military assistance. To the extent that other nations gain strength, and local dangers diminish, it may become possible to reduce such aid. But major reductions are not in prospect. In some instances, our military aid is essential to progress toward political stability on an increasingly democratic basis.

DISARMAMENT

"Since a major nuclear war would be a world catastrophe, the limitation and control of nuclear armament is imperative. Disarmament should be our ultimate goal. It cannot be attained without eliminating the sources of distrust and fear among nations. Hence, our immediate task must be the step-by-step advance toward control of nuclear weapons and their means of delivery, with effective international inspection. A safeguarded agreement to suspend nuclear testing may well be the first step, and would tend to limit the number of nuclear powers.

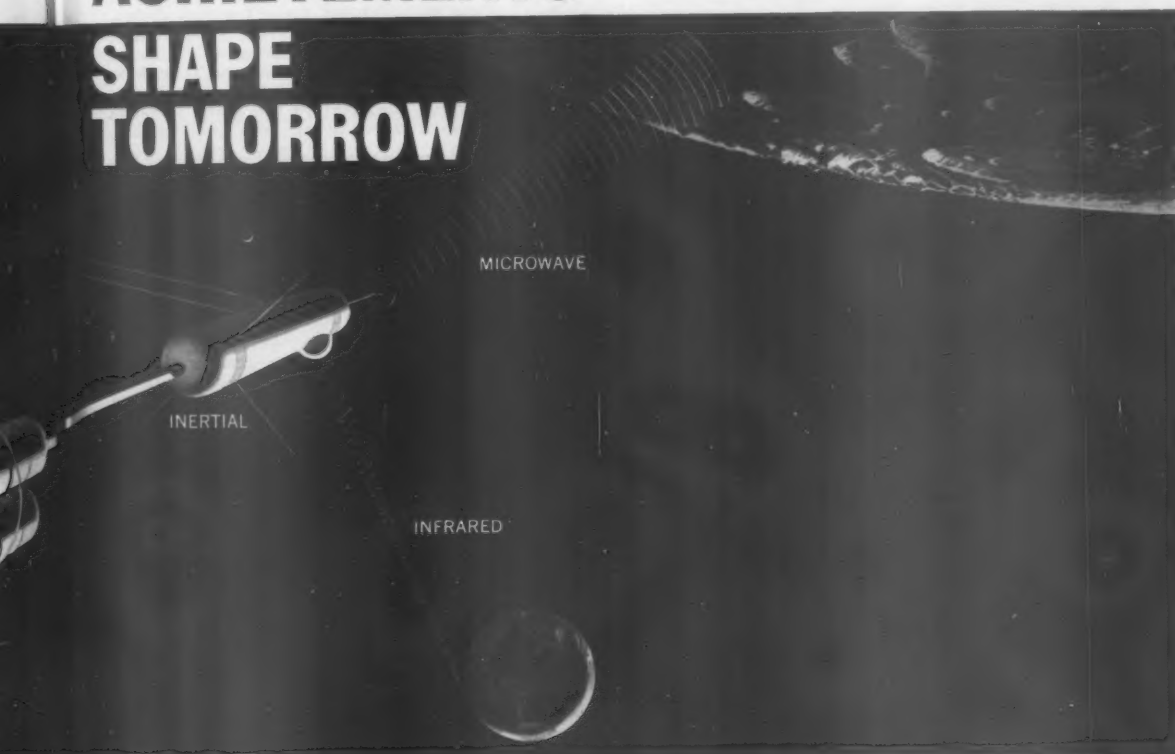

"In view of the complex interaction of arms control and national security, we must organize a major Government effort for the study and analysis of political, military, and technical issues in order to provide a sounder basis for policy formulation and negotiation.

"The essential condition of any stabilizing agreement must be that neither side be left in a position of significant advantage. Inspection measures providing adequate safeguards must be accepted by both sides, but we should recognize that any inspection system will have risks which must be balanced against the advantages of arms limitation agreement.

"A real difficulty in progress toward arms limitation is to induce the Soviet Union to overcome its long habit of secrecy. The United States and its allies should emphasize their readiness to accept international inspection, although it will mean a degree of foreign presence and activity that will be novel and distasteful even in our open societies."

TODAY'S DEMONSTRATED ACHIEVEMENTS

SHAPE TOMORROW

GENERAL PRECISION, INC.

Experience and demonstrated achievement with sensing techniques and devices is one way to judge those who aid you in the fulfillment of your project requirements. General Precision's Divisions provide sensors for Subroc, Polaris, Atlas and Talos; optical devices, star trackers, automatic sextants and self-contained doppler radar systems to many major military projects. ■ Bringing tomorrow in view are General Precision's engineers working on advanced sensor developments. Cryogenic inertial platforms, nuclear gyroscopes, wide angle sextants, discriminating star trackers, optical masers, infrared systems and passive doppler systems. These projects with their technological advancements will help shape tomorrow. ■ General Precision's Divisions...GPL, Kearfott, Librascope and Link... represent the combined capabilities of over 15,000 qualified personnel, occupying over 2 million square feet of laboratory and production facilities. Write for the Facilities and Capabilities Brochure. Learn how General Precision can help you solve your most challenging system design and development problems. SERVICE FAMILY NOTES

Family Editor
Louise B. McGiffertBertie Johnson
Associate Family EditorAF Wives Honor
Mrs. Thomas White

The Air Force Officers Wives' Club will stage its annual Christmas Tea 8 December to honor Mrs. Thomas D. White, wife of the Air Force CofS, at the Army-Navy Country Club. A musical program will be presented by the Strolling Strings and a group from the Air Force Band.

Mrs. Charles P. Cabell is the tea chairman, assisted by Mrs. Kenneth P. McNaughton, Decorating Chairman.

On 14 December the club is sponsoring a Christmas party for the children's wards at Walter Reed General Hospital. Santa will present gifts and refreshments.

Mrs. Harold Holland, Chairman of the Emergency Assistance Committee, will be in charge.

Dental Wives Will
Greet Mrs. Decker

The Army Dental Wives Club will hold their Christmas Luncheon 15 December at 12:30 P.M. at the Walter Reed Army Medical Center Officers' Club. Hostesses will be the ladies of the Military District of Washington Dental Command.

Mrs. George F. Decker, wife of the CofS, Mrs. Leonard D. Heaton, wife of Lieutenant General Heaton, Surgeon General of the Army, Mrs. Clement St. John, wife of Major General St. John, CG of Walter Reed Army Medical Center, and Mrs. Clinton Lighter, wife of Brigadier General Lighter, Commanding Officer of Walter Reed General Hospital, are guests of the day.

These ladies, with Mrs. Joseph Bernier, wife of Major General Bernier, Assistant Surgeon General of the Army and Chief of the Dental Corps, and Mrs. Clarence Canby, wife of Brigadier General Canby, Director of Dental Affairs, Walter Reed Army Medical Center, will form the receiving line to greet all attending the luncheon.

Mrs. Flint Leads
Killeen Army Wives

The Killeen Army Base, Tex., Officers' Wives Club has elected Mrs. Glenwood Flint as President, succeeding Mrs. Harold H. McCarthy.

Others elected were Mesdames James T. Rathbun, First Vice-President; Cecil H. Cates, Second Vice-President; Clifford N. Micker, Secretary, and Hughey L. Griffith, Treasurer.

Mrs. Dean R. Blincow, hospitality chairman, introduced Mesdames Donald Jones, Ralph Halliday, Donald Davis, Richard Larson and Edward Green as new members at the election meeting.

Hostesses were Mrs. Micker, Mrs. William C. Isenberg, and Mrs. Alfred B. Colson.

Valley Forge Responds
To Army Distaff Drive

A \$685 check for the Army Distaff Foundation is presented to Maj. Gen. Alvin L. Gorby, Commander at Valley Forge General Hospital, by Mrs. Paul V. Kiehl, Chairman of the hospital's fundraising committee for the Foundation. The money represented receipts from a bake sale and from a Forty-Niner's Night party.

Assisting Mrs. Kiehl were Mesdames Alvin L. Gorby, Nelson R. Blemly, William G. Dunnington, M. C. Stith, Stewart L. Baker, Jr., and John S. Oartel.

BOUNTIFUL BUFFET

The Engineer Officers Wives' Club of Washington, D. C., with their husbands as guests, will hold their annual Bountiful Christmas Buffet from 7 to 9 on 10 December at Patton Hall, Ft. Myer, Va. Lt. Gen. Emerson C. Itschner, Chief of Engineers, and Mrs. Itschner will be welcomed.

Mrs. John Burfening, assisted by Mesdames Charles H. Banks, Edmond Faust, William Gribble, Frank Camm and Marvin Kortum, is in charge of the arrangements. Mrs. Robert Dalrymple and Mrs. Vernon T. Loesing, whose husbands are in Korea, will help Mrs. Stanley Dziuban, Services Chairman, raffle prizes. The money collected will be added to the Services Fund, to be donated to a designated charity.

Also on hand to welcome guests will be Mrs. John C. H. Lee, Club President, and her husband, Colonel Lee.

Reservations must be made by Tuesday 5 December with Mrs. J. B. Meanor, 2126 Hollister St., Arlington, Va.

groups were coordinated by Mrs. Henry B. Fitch, Chairman of Arrangements for the Women's Club.

A short business meeting was presided over by the President, Mrs. William L. Blake, who introduced Mrs. W. Paul Johnson, wife of Major General Johnson, CG, Army Armor Center, and Honorary President of the organization. Mrs. Johnson presented a farewell gift to Mrs. Ralph J. Butchers, wife of Major General Butchers, the new Provost Marshal General.

The fashion show was arranged by Mrs. Laverne E. Dye, Program Chairman.

Christmas Fashion Album Attracts
400 Members And Guests At Ft. Knox

A "Christmas Album of Festive Fashions" was the entertainment provided at the November meeting for members of the Women's Club of the Army Armor Center at Ft. Knox, Ky.

Hostesses for the event, which was attended by more than 400 members and guests, were ladies of Ireland Army Hospital, jointly headed by Mrs. Kenneth A. Brewer and Mrs. Jules J. McNerney; Headquarters Group, Army Armor Center, led by Mrs. Robert C. Harper, and Armor Officer Career Course, under Mrs. Edwin S. McClure. The efforts of these

Reserve Officer Association Hits
"Gold Dollar Widow" Directive

The Reserve Officers Association, through its President, Maj. Gen. Carl T. Sutherland, has asked for a review of the directive to cut the travel of Service families overseas.

"The decision to split thousands of American families, and to require mothers and fathers to live apart from each other, and to separate children from their fathers, touches the most sensitive nerve in American society," General Sutherland said. "The sacrifice should not be required unless it is vitally necessary for National security. It may develop that precisely the contrary result may be obtained."

General Sutherland said several chapters of ROA in Europe have called upon the Association's National Headquarters to intercede in this matter.

"We certainly believe this decision

should be re-evaluated," General Sutherland said. "We do not know all the facts behind this order, but we are committed to see that all the complex facets of the problems thus created are studied."

General Sutherland said some ROA chapters have adopted resolutions asserting that the removal order will (1) undermine the morale and the military effectiveness of U. S. Forces; (2) deter the "Cold War" effort; (3) encourage an increase in "incidents" in occupation areas and (4) hamper the program of incentives designed to retain officers in service in grades where there are officer shortages.

General Sutherland who is Chairman of the Department of Army General Staff Committee on Reserve Policy and Commander of the 81st Infantry Division (USAR) with headquarters in Atlanta, Ga., recently completed a two weeks tour of Army and Air Force bases in Germany and France.

JAG Wives Hear RAdm. Mott

RAdm. William C. Mott, Judge Advocate General of the Navy, spoke to the Navy Judge Advocate General Wives at a luncheon 22 November, at Ft. Myer, Va. His subject was "International Law in Today's World."

Honored guests were Mrs. Mott and Mrs. Robert Powers, wife of the Deputy Judge Advocate General.

Mrs. Curtis T. Youngblood was Luncheon Chairman, assisted by Mesdames Max D. Wiviott, John W. Robertson, Saul Katz, Harry L. Meade, Jr., David Miller and Will J. Davis, Jr.

Mrs. B. H. Berry is President of the Club.

Walter Reed Women Meet

A timely demonstration of Christmas decorations technique, will feature a gathering of the Walter Reed Women's Club at a luncheon at the Officers' Club 7 December.

Hostesses will be wives of officers of the Walter Reed Army Institute of Research, with Mrs. Gerald E. Geise and Mrs. Mossman Roueche as co-chairman.

Special guest of honor will be Mrs. James H. Forsee, wife of General Forsee, Special Assistant to the Army Surgeon General for Research and Development.

Service Weddings and Engagements

MISS Marjorie Ann McDonnell, daughter of Mrs. Anthony J. McDonnell, of 130 Summit Avenue, Neptune City, N. J. and the late Mr. McDonnell, and Mr. Millard Girard Kelly, son of Col. (USA - Ret.), (USMA '35), and Mrs. Burnis M. Kelly, were married 26 November at St. Elizabeth's Church, Avon - by - the - Sea, N. J.

Given in marriage by her brother, Mr. Paul Thomas McDonnell, the bride chose Miss Frances M. Davenport as maid of honor and Misses Veronica Kelly, cousin of the bride and Kathleen Schreck as bridesmaids. Best man was Mr. Ira D. Stein Groomsman were Messrs. Richard Berberich and Frank Sikelton, brothers-in-law of the groom.

Mrs. Kelly attended Monmouth College, West Long Branch, N. J. Her husband is a graduate of Monmouth College, where he was a member of the Phi Delta Sigma Fraternity. He is in the Navy, stationed at Boston.

Mrs. Kelly

MASSINGALE-WHITE — Mr. and Mrs. E. O. White, Peoria, Miss., announced the engagement of their daughter, Faye Lorena, to Lt. John T. Massingale, son of Lt. Col. and Mrs. Massingale of 641 McBride, Ft. Sill, Okla.

Miss White recently graduated from Mathen School of Nursing, Southern Baptist Hospital, New Orleans. Her fiancé was graduated from Texas A & M College, and is now on duty at Craig AFB, Ala.

The wedding is planned for 3 December in the Robinson Baptist Church, Peoria.

STOLSITS-MAGEE—Announcement is made of the engagement of Miss Margaret J. Magee, daughter of Mrs. J. Vincent Magee of 98 Central Ave., Newtonville, Mass., and the late Mr. Magee, to Capt. Frank L. Stolsits, USA, son of Mrs. Frank L. Stolsits of Northampton, Pa., and the late Mr. Stolsits.

Miss Magee attended Bryant and Stratton Business College. Her fiancé is a graduate of Gettysburg College, and received his M.B.A. from the University of Alabama. He is presently station at the Quartermaster Research and Engineering Command, Natick, Mass.

The wedding is planned for the Christmas holidays.

WELLS-WALKER — Mr. and Mrs. Charles E. Walker of Nashville, Tenn., have announced the engagement of their daughter, Virginia Catherine, to Capt. Arthur David Wells, (USMA '53), son of Mr. and Mrs. Hugh K. Wells, of Paw Paw, Ill.

Miss Walker, a stewardess with American Airlines, attended the University of Alabama, Vanderbilt University, and Peabody College at Nashville.

The wedding is planned for February at Ft. Sill, Okla., where Captain Wells is stationed.

Miss Walker

CARLOTTI-CONE — Col. and Mrs. John D. Cone, 306 Arcadia Place, Terrell Hills, San Antonio, announce the engagement of their daughter, Laurie Churchill to Mr. Arthur Charles Carlotti of New York City. He is the son of Mrs. Carlo Louis Carlotti and the late Mr. Carlotti.

Photo by Cohen Bros.

Miss Cone

Miss Cone is a graduate of Thomas Jefferson High School, San Antonio, and attended Tarleton State College, Stephenville, Tex. She was one of the two Ft. Sam Houston princesses for the Fiesta San Jacinto in 1958. For the past year she has worked in New York City, where she lives with her uncle and aunt, Maj. Gen. and Mrs. W. M. Creasy, USA-Ret. General Creasy is a Vice President of the Lummus Company. Miss Cone is the granddaughter of Col. J. M. Churchill of San Antonio, and of Mr. and Mrs. U. J. Cone of Pine Bluff, Ark. Her maternal great-grandfather was the late Maj. Gen. Beaumont B. Buck of San Antonio.

Mr. Carlotti has been with the New York office of the Lummus Company for several years.

Miss Cone and her fiancé will visit her parents in San Antonio during the Christmas holidays.

Family Separations Set For Thousands

From first page—

member an official memorandum from Secretary of Defense Gates—text on Page 21—concerning the "Gold Dollar Widow" directive.

They were told to submit their plans to the Defense Department by 5 December. This means that the Services will not know before that date at the earliest what they can tell the field as to long-range plans.

THE JOURNAL was told repeatedly by Service personnel authorities that the best advice that could be given to military families at this time would be to avoid making any decision that could be forestalled.

One Air Force official put it this way: "If you don't have to sell your house, don't sell. If you don't have to make a decision immediately about schooling for children, try and be patient."

The Navy and Air Force were able to say (THE JOURNAL 26 November) that all families slated to go overseas during December and January would go, and that none would be sent after 31 January.

The Army similarly was able to assure travel for persons holding December orders, but was unable to say what would happen to the January group. Like the other Services, the Army said family travel would be suspended effective 1 February.

As was reported last week, the Army faces a rough problem in January. Under previous plans, the number of dependents going overseas that month actually would have resulted in an increase, instead of a decrease in dependent strength.

Anxious to do everything possible to alleviate family hardships and to safeguard morale, the Army this week was giving the January situation the closest possible attention. Meeting at the Pentagon, G-1 representatives from all major commands were analyzing the problem in such detail that they were counting the number of dependents for each officer and noncommissioned officer slated for overseas duty or due to return to the United States.

Calculations were being made that if an Army man with five children, for example, were ordered home from Europe several months ahead of sched-

ule, it might be possible to send two families overseas in January.

The Air Force convened a meeting of personnel representatives from all major commands at the Pentagon on 28 November. But in the absence of decisive action by the Defense Department, it was impossible to formulate any detailed plans.

Service leaders in Washington are receiving anxious reports from some commanders in the field concerning the plight of families who may become separated. These reports are strongest from areas where there are heavy Service school populations, such as Ft. Benning, Ga., and Maxwell AFB, Ala.

There will be numerous cases where officers no attending schools on PCS will receive orders which will require them to leave their families. In many cases, the families may elect to stay in the area for "The Duration." This could lead to serious housing problems.

JAG Wives Greet Holiday

The Army Judge Advocates' Wives Club will welcome the Christmas season with a luncheon 7 December at noon at the "Old Club" restaurant in Alexandria, Va.

"CASH BONUS" REJECTED:

The Pentagon Has Changed Its Tune; Split Family Was Morale Factor Last Year

LESS than 10 months before the controversial "Gold Dollar Widow" order restricting overseas travel of military families, the Defense Department told Congress that establishment of a reduced "unaccompanied" overseas tour for the Armed Services would "destroy the morale of its fighting forces."

Assistant Secretary of Defense Charles C. Finucane was asked by Chairman Melvin Price (D-Ill) of the House Subcommittee on the Utilization of Military Manpower to comment on the possibility of reducing overseas tours to six months.

In reply, the Pentagon manpower chief said the Defense Department continuously studies its policies "with the objective of reducing costs, increasing efficiency, and maintaining career patterns which will attract and keep qualified personnel in the Armed Forces. While not opposed to any change of the present system which will contribute to these objectives," he said, "the Department of Defense cannot support changes which will significantly lessen the ability of the Armed Forces to perform their defense mission or destroy the morale of its fighting forces. It is believed the proposed change to a six-month unaccompanied overseas tour would do both."

Secretary Finucane disclosed that the Pentagon has considered a number of "alternative methods" for meeting its overseas commitments without incurring the personnel and dollar costs resulting from its present system.

One possibility, he said, is to limit foreign assignments to personnel who have no dependents. But, he added, "This appears out of the question, so long as more than half of all military personnel (85% of the officers, 47% of enlisted men) have dependents and more than 30% of our forces are overseas."

"Further," Secretary Finucane said, "it would permit individuals to avoid foreign duty, often distasteful, by merely acquiring dependents. By so doing they would increase their cost to the

NINE DAYS LATER:

Here Is Text Of Pentagon Memorandum Implementing President's Travel Order

(This is the text of the memorandum which was issued to the Services by Secretary of Defense Gates on 25 November. This was nine days after the President announced action to reduce the number of Service dependents overseas from 484,000 to 200,000.)

This memorandum outlines the policies which will be followed and actions which will be taken to comply with those sections of the Directive of the President dated November 16, 1960 that concern the number of dependents in foreign countries. Any exception to the policies outlined below shall require the personal authorization of the Secretary of Defense or Deputy Secretary of Defense.

Without diminishing our effective military strength, a reduction of the number of dependents of military personnel and civilian employees of the Defense Department in foreign countries to a total of not more than 200,000 authorized at any one time will be effected as follows:

(a) Beginning January 1, 1961, the total number of dependents in foreign countries will be reduced at the rate of not less than 15,000 per month.

(b) The total reduction will be effected not later than July 31, 1962.

(c) The required reductions will be made, to the maximum extent feasible, in the highly industrialized countries with strong currencies.

(d) Reduction of dependents will be effected impartially throughout the grades and ranks of military and civilian personnel insofar as possible.

(e) DOD Directive 1315.7, May 7, 1957, "Rotation and Overseas Movement of Dependents" as amended by letter exceptions and DOD Instruction, March 24, 1959, "Standardized Tours of Duty for United States Citizen Civilian Employees of the Department of Defense in Overseas Areas" remain in effect. However, since an increased number of unaccompanied tours will be necessary in implementing this policy, consideration will be given by the Office of the Secretary of Defense to Service recommendations for changing length of overseas tours in accordance with existing procedures.

(f) Military services may curtail overseas tours of accompanied personnel if necessary in order to reduce to the minimum the number of dependents who might have to return to the United States unaccompanied by their sponsor in order to implement paragraph (g).

(g) The total objective and monthly objective will be provided to each military department by December 15, 1960. In the interim, it is necessary to plan a reduction in number of dependents in foreign countries by 15,000 per month. For the present, each military department will plan its reduction on the basis of its proportionate share of dependents in foreign countries. The monthly reductions by service will be audited by the Office of the Secretary of Defense and such adjustments as may be appropriate will be made to insure the accomplishment of the objective in a manner which is equitable to all services.

(h) Reduction quotas/ratios affecting MAAGs, Missions, Attaches, Joint and Combined Headquarters will be provided by Office of the Secretary of Defense for inclusion in service overall totals.

(i) Implementation of this memorandum will be predicted on returning dependents with sponsors on completion of normal tours to the extent possible. It is contemplated that to a large measure the return of dependents can be accomplished by (a) normal tour terminations; (b) some sponsors returned before completion of normal tours; and (c) curtailment of dependents proceeding overseas.

The terms of this memorandum do not apply to any states of the United States or to the Canal Zone, Marianas, Marshall Islands, Midway Island, Puerto Rico, Samoa and Virgin Islands, and other areas that may be designated by the Secretary of Defense.

It is desired that each military department render to Office of the Secretary of Defense no later than December 5, 1960, a list of the actions taken to carry out the provisions of this memorandum.

READERS' VIEWS

From page 8—

What Lt. Col. Lancaster fails to realize is that non-flying Army officers (we have pilots too, you know) do not understand why there should be flight pay for not flying. No one objects to flight pay for flying, jump pay for jumping, demolition pay for demolishing, sub pay for submarining, medical pay for doctoring and even veterinary pay for vetting. What we do object to is extra pay for not doing any of these things. Experience counts but not that much.

We are at a loss to know the logical reason for paying money because an officer used to do these things. To say that one has gotten used to living on this extra money is hardly a reason to keep paying the money. It is hard for us to believe that the Air Force fatality statistics for non-flying officers in either wartime or peacetime can be much higher than that for other desk bound soldiers. Even the insurance rates for an ex-flyer shouldn't be much higher than the insurance rates for other grounded officers.

Lt. Col. Lancaster, I had the courage to sign my name to my letter of 5 March but apparently no one had the courage or the knowledge to answer that letter on hazardous hazard pay. I feel the attack on the unnamed artillery officer for his humorous letter

was uncalled for. More important, your answer begs the question: What are you doing now which justifies flight pay if you are no longer flying?

JOHN JAY DOUGLASS
LIEUTENANT COLONEL, JAGC

Great Confusion

I want to report my views on the President's decision to curtail dependent movement overseas. Incidentally, I have seen and heard more confused and misunderstood comments on this matter in the few hours since release time than on any single issue I can recall.

The manner of release was bad. It is unbelievable to me to think that such release would come from a vacation golf course.

The lack of explanation or the meaning thereto leads to burning questions that will disturb most field commanders. The sacrifice will always be made when it is known what is desired and why. We would like to know why approximately one-half of the dependents will be present overseas and the others will not be? Which dependents will be allowed? What can we do to encourage young career leaders to seek the service as a way of life? [How much gold will we actually save?]

LT. COL., INFANTRY

Died

BENITEZ—Died of a heart attack at her home, 1080 N E 104th St, Miami Shores, Fla, 21 Nov, Mrs Blossom Compton Benitez, wife of Col Enrique M Benitez, USA, Ret. In addition to her husband, survived by a daughter, Mrs Russell C Faber, and a son, Rev Maurice M Benitez, USMA '49, Burial Arlington National Cemetery.

COPP—Died USNH, San Diego, Calif 22 Nov Capt Charles C Copp, SC, USN-Ret, 70. Survived by his widow, Mrs Mary Copp;

and one son, Maj Duport M Copp, USA, 5729 No 5th St, Arlington, Va.

COVELL—Died USNH, San Diego, Calif 20 Nov Vadm Leon C Covell, USCG-Ret, 83. Survived by his son, L C Covell, Jr, San Diego.

EASTON—Died USAH Maxwell AFB, Ala 19 Nov Brig Gen Robert Loyal Easton, 53, USAF-Ret, former Dep CofS for Admin, Air University, Maxwell AFB, and head of Mil Mission to Ecuador, WWII. He lived at 136 S Haardt Dr, Montgomery, Ala. Survived by his wife, Mrs Carolyn Easton; 3 brothers and a sister. Services & burial Arlington National Cemetery 25 Nov.

FAHRNEY—Braddock Heights, Md 23 Nov Dr H Laurence Fahrney, father of Lt David L Fahrney, USN, Norfolk, Va.

FAWCETT—Died Martin AH, Ft Benning, Ga 10 Oct Lt Col Ralph M Fawcett, USAF-Ret, 57, WW I veteran of the Pacific theater. Survived by his widow, Mrs Eula V Fawcett, 111 Lake Forrest Ln, NE, Atlanta, Ga; his mother, Mrs Martha E Drummer, Ottawa, O; and three sisters and three brothers. Burial Arlington National Cemetery, Washington, DC.

HOBBS—Died USNH, Bethesda, Md 23 Nov Capt Allen Hobbs, USN-Ret, (USNA '19), 61. Survived by his widow, Mrs Fawcett P Hobbs, 2904 Garfield Ter, NW, Washington, DC; three children, Charles, Mrs C E Wilson & Lt Allen Hobbs, Jr, USN & 3 grand-children. Burial Arlington National Cemetery.

HOVEY-KING—Died in New Orleans, 26 Nov after a brief illness, Mrs Alvin Hovey-King, 67, former resident of Washington, DC; daughter of the late Lt Col & Mrs Henry B Moon, & widow of LCDr Hovey-King. Survived by a daughter, Mrs Jules de Fazende Yokum, New Orleans; a sister, Mrs Francis B Eastman, Mandeville, La, and 3 grandchildren. Burial Arlington National Cemetery 29 Nov.

LONGMIRE—Died in Walter Reed GH, Washington, DC 20 Nov Maj Evelyn C Longmire, USAF, Burial Henderson, NC.

LOWRY—Died Garden Grove, Calif 22 Nov Lt William R Lowry, USN.

MATTHEWS—Died at Baltimore, Md 15 Nov Mrs Marjorie S Matthews, wife of Col Frederick S Matthews, USA, Ret. In addition to her husband, survived by two daughters, Mrs John Hayes, wife of Lt Col Hayes, Rabat, Morocco, and Mrs John L Schutz, wife of Col Schutz, Ft Hayes, O. Burial, Arlington National Cemetery.

MAYHEW—Died Denver, Colo 22 Nov Lt (Jg) Elston E Mayhew, USNR.

MERRILL—Lafayette, Ind 11 Nov Col Philip W Merrill, USA-Ret, (USMA '29), 54. Survived by his widow, Mrs Caroline T Merrill, 2324 Northwestern Ave, West Lafayette, and four children, Mrs James Saunders, Frederick, Ann & Patricia Merrill.

MILLEDEGE—Died Tripler GH, Honolulu, Hawaii 22 Nov Mrs Jean Hutchison Milledge, 42, wife of Lt Col Henry L Milledge, USAF, Commander, 50th Air Transport Sq, Hickam AFB, Hawaii. Also survived by three children, Henry L, Jr, 16; Ann M, 13, & Katharine E Milledge, 6; and three brothers, Col James R Hutchison, USAF, Dep Comdr, 314th Adiv, Korea, Mr James R Hutchison & Capt William Hutchison, USA, Burial Golden Gate National Cemetery, San Bruno, Calif, 28 Nov.

MILLING—Died Walter Reed GH, Washington, DC 26 Nov, after long illness, Brig Gen Thomas DeWitt Milling, 73, one of the Nation's first military pilots and WW I veteran. Survived by his wife, Margaret, 2230 California St, NW, Washington, DC; a daughter, Mrs Joseph S Gardner of Honolulu, a brother, Robert C Milling, & 3 sisters, Ida Chapman, Dixie Sherman & O'Delle Christian, all of New Orleans. Services at Ft Myer 1 Dec. Burial Arlington National Cemetery.

NEANDER—Died Cupertino, Calif 23 Nov LCDr James S Neander, USN.

NORRIS—Died at Brooke GH, Ft Sam Houston, Tex 21 Nov, following long illness, Mrs Grace Norris, wife of Col Ned T Norris. In addition to her husband, survived by a daughter, Nancy T Norris, her father, Mr M S Williams Sparta, Ga, 2 sisters, Mrs J B Kennedy, sr, of Devereux, Ga, and Mrs T R Watkins of Macon, Ga, & by a brother, Mr John Williams of Sparta. Services at Ft Myer, Va 25 Nov. Burial Arlington National Cemetery.

PORTER—Died Walter Reed GH, Washington, DC 5 Nov Mrs Lucienne Westbrook Porter, wife of Col Daniel B Porter, Jr, Operations Officer, US Army Infantry School, Ft Benning, Ga. Also survived by one daughter, Mrs T C Cox, wife of Captain Cox, USMC, Milton, Fla; three grandsons; and one sister and one brother.

VAN KEUREN—Died after a heart attack at Bethesda NH, Bethesda, Md 27 Nov, Mrs Helen C Van Keuren, 78, wife of RADM A H Van Keuren, USN-Ret, 8013 Aberdeen Rd, Bethesda. Besides her husband, survived by a son, A H Van Keuren, Jr, 3817 Jocelyn St, NW, Washington, DC; a daughter, Mrs H G Pestalozzi, 112 Quincy St, Chevy Chase, Md; a sister, Mrs H A Haines of Philadelphia; a brother, Philip S Molten of San Rafael, Calif, and 5 grandchildren. Services at Ft Myer, Va 1 Dec. Burial Arlington National Cemetery.

WALDEN—Died Norfolk, Va 20 Nov LCDr John S Walden, USN.

General Litzenberg Will Head Retired Association Study

From first page—

Directors and to evolve a proposed plan for expansion in the present regional representation on said Board; the said Committee to be charged with the responsibility of making early recommendations to the Board of Directors for its consideration to the end that additional regional representation can be made effective as soon as practicable."

2) Provide that "hereafter when proxies are mailed by the Association to its members, there be included with the mailing of said proxies, the recommendation of the Nominating Committee containing the names of those who will be placed in nomination by said Committee for election to the Board of Directors, and a copy of the Resolutions and any other matters of major import which are to be considered at the Convention. This to provide that every member receiving such proxies will know for whom his proxy will be voted for the election of Directors, and the Resolutions for which the proxy will be voted, if executed and mailed to the National Headquarters of the Association, in accordance with the established procedure."

Start With Bylaws

The new group started into action when the very first resolution was called up. This was the usual type of resolution reaffirming the Bylaws of the Association and confirming prior actions of the Board and Executive Committee. They had this amended to strike out the words "that the Bylaws of the Association be reaffirmed" but retained the wordings that the "proceedings, acts of and elections and appointments made by the said Board and by the said Executive Committee are hereby approved, ratified and confirmed."

Leaders in the movement included Col. William Hones, USA-Ret, of Diggs, Va., Maj. Gen. Patrick H. Tansey, USA-Ret, of Arlington, Va., Maj. Gen. Stanley L. Scott, USA-Ret, of Alexandria, Va., and Maj. Gen. George J. Richards of Pennsylvania.

The group was well organized in advance and held proxies from members all over the nation. At the opening of the meeting they distributed to other attendants a statement setting forth their objectives as follows:

Change Election Rules

"It is believed that the bylaws of the Association should be modified so as to make the Association more democratic and representative of the views of the membership, by incorporating the following changes:

"1. Provide for the election of regional directors based on distribution of retired membership throughout the United States.

"2. Inform membership of such major issues as names to be placed in nomination for office and resolutions to be presented at biennial and other conventions, through the medium of the issue of 'The Retired Officer' published immediately preceding such meetings, thus abandoning the existing 'sign blind' proxy system and substituting therefor a means of allowing the membership to cast an informed and intelligent vote.

"In order to accomplish these objectives, it is believed that Resolution Number 1 'Reaffirm the Bylaws, etc.' (which is to be presented to the Convention today) should be defeated and that a committee should be appointed, composed of members other than Officers and Directors of the Association, to revise the bylaws accordingly. During the meeting it will also be urged that the Retired

Officers Association cease playing a lone hand in the fight for equalization of retired pay and work in harmony with ALL other groups who are striving for the same results.

Support By Hundreds

"Either Maj. Gen. Patrick H. Tansey or Maj. Gen. Stanley L. Scott (both USA-Ret.) will discuss the above proposals from the floor.

"The following named retired officers' organizations, among others, have signified their full support to these proposals:

"Peninsula Retired Officers of California (650 members).

"The San Antonio (Texas) Retired Officers Club (800 members).

"The Virginia Retired Officers Association (1700 members).

"The Santa Monica Bay Area Officers Club of California.

"Louisiana-Texas Retired Officers Association of Shreveport, La.

"The Anniston, Ala., Retired Officers Club."

The appeal for proxies sent out by the group was so worded that those members signing it revoked any previous proxy they may have given to officers of the Association.

The group was immediately successful in getting one of their members elected to the Board. There were only two vacancies on the Board. One of those nominated by the nominating committee withdrew before the meeting and the other, Lt. Gen. Homer L. Litzenberg, USMC-Ret., was elected first vice-president and a member of the board. For the other Board vacancy, General Scott, one of the active members of the insurgent group, was nominated from the floor and also Maj. Gen. John F. Uncles, USA-Ret. General Scott was elected.

Members of the new group seemed pleased with the promptness with which General Edwards appointed the committee to study the proposed broadening of representation on the Board. They also

appeared satisfied with the distribution of the Committee members geographically and by services. Appointed to the Committee were:

General Litzenberg, Chairman; RAdm. Leo A. Colbert, USC&GS-Ret, of Washington, D. C.; VAdm. R. O. Davis, USN-Ret., Virginia Beach, Va.; RAdm. Benton W. Decker, USN-Ret., San Diego, Calif.; Lt. Col. Burton N. Everett, USA-Ret., Mount Clair, N. J.; RAdm. Norman B. Hall, USCG-Ret., Chevy Chase, Md.; Assistant Surgeon General Lawrence Kolb, USPHS-Ret., Washington, D. C.; Brig. Gen. William P. Nichols, USAF-Ret., Winter Garden, Fla.; Maj. Gen. Stanley L. Scott, USA-Ret., Alexandria, Va.; General William H. Simpson, USA-Ret., San Antonio, Tex., and Col. Oswald H. Saunders, USA-Ret, of Washington, D. C. Colonel Saunders, an employee at the Association's headquarters, will serve as the Committee's Secretary.

Show Faith In Gen. Edwards

The original objective of the group was that no officer or Board member be on the Committee, but subsequently, to show their faith in General Edwards, they eliminated this requirement from the resolution, giving General Edwards a free hand in making the appointments. It will be noted that the 11-man committee as appointed by General Edwards lists only four Board members, General Litzenberg, Admiral Colbert, Assistant Surgeon General Kolb and General Scott, one of the sponsors of the resolution. The committee also gives wide representation to areas away from Washington and particularly to Virginia where the reorganization movement had strong support.

Members of the new group state that they are devoted to the Association and its objectives. What they hope to achieve, they say, is to make it stronger and more effective in attaining realization of the programs sought by it and its members.

Spaniol, George P. YARD (Enl), to USN Supply Corps School, Athens (Duins).

Davy Crockett Contract For 20mm Spotter Rounds

The Eureka Williams Company of Bloomington, Ill., has been awarded a \$300,000 contract for production of fuses, used in the 20 mm, conventional spotter rounds of the Army's Davy Crockett weapon system.

Davy Crockett is a man-and-jeep-portable weapon which will give infantry and armor troops a low-yield nuclear punch at close ranges. It can also fire a conventional high explosive warhead.

Eureka Williams is a division of the National Union Electric Corporation of Stamford, Conn.

In announcing the award of contract from the Remington Arms Company, Inc., Lake City Arsenal, Independence, Mo., C. Russell Feldmann, Board Chairman and President, noted that in another field of defense work, Eureka Williams had received a contract from the Aeronutronic Division of Ford Motor Company to develop thermal batteries for the Shillelagh, an Army surface-to-surface missile.

GIFT

Wondering what to give to an Officer friend or associate for his birthday, anniversary, for the NEW YEAR or for any special occasion such as a Promotion or Retirement? Give THE JOURNAL, as many subscribers now do.

All at once, you will solve that gift problem and will be well remembered week after week for your thoughtfulness. The cost of The JOURNAL is just less than 15c per issue.

Use the handy coupon below today. Include your friend's name and we will be sure to send a special Gift Card with your name on it, as the donor. Give JOURNAL Gift Subscriptions today.

Chance Vought Is New Corporate Name

Chance Vought Corporation, the new corporate name for the nation's third oldest aerospace company, will become effective 31 December.

The corporate name change will be achieved by dropping the word "aircraft" from the present name—Chance Vought Aircraft, Incorporated—to reflect the company's diversity more accurately, according to President F. O. Detweiler.

WWII Marine Lieutenant Heads GE Army Sales

Robert E. Bell, 5010 White Flint Drive, Kensington, Md., has been named District Sales Manager—Army Programs for the General Electric Company's Heavy Military Electronics Department, under H. A. Crossland, Manager of the Washington Region.

Mr. Bell will provide marketing and engineering liaison service to the Army, NASA, Defense Communications Agency, ARPA, and National Security Agency in the Washington area. His office is located in the Wyatt Building, 777-14th Street, N. W.

During WW II, Mr. Bell was commissioned a Lieutenant in the Marine Corps. He attended radar schools at both Harvard and Massachusetts Institute of Technology, and served as a radar technical officer with the Air Warning Group.

Mr. Bell replaces H. N. McIntyre assigned to the General Electric Company's subsidiary in The Hague, Netherlands.

RETIRED ACTIVITIES:

M/G Ankenbrandt Gets New RCA Post; Air War College Chief Will Leave Service

Maj. Gen. F. L. Ankenbrandt, USAF-Ret., has been named to the new position of Manager, Defense Product Assurance, it is announced by A. L. Malcarney, Executive Vice President, Defense Electronic Products, Radio Corporation of America at Camden, N. J.

Mr. Malcarney said that, under General Ankenbrandt's direction, the new group will centralize staff direction of all reliability, maintainability, value improvement and quality control activities which are performed at many levels and at many offices throughout Defense Electronic Products.

After retiring, General Ankenbrandt, USMA '26, with a Master of Science degree from Yale, joined RCA Defense Electronic Products in 1956 as Manager of Defense Projects and later became Administrator of Global Communications and Deputy Director of Program 480L (AIRCOM).

Maj. Gen. Richard H. Carmichael, USAF-Ret., Commandant of the Air War College at Maxwell AFB, Ala., who arrived at Pearl Harbor during the attack on 7 December, 1941, has requested retirement. General Carmichael served in the Pacific Theater of Operations until he was shot down in August 1944. He was a prisoner of the Japanese until his liberation in August 1945.

Among his many decorations are the DSC with Oak Leaf Cluster, Silver Star with Oak Leaf Cluster, the Legion of Merit with four Oak Leaf Clusters, DFC with one Oak Leaf Cluster, Air Medal with three Oak Leaf Clusters, the British DFC, and the Distinguished Unit Citation with four Oak Leaf Clusters.

General Carmichael and his wife, the former Muriel Wright of Olean, New York, intend to reside temporarily in Washington, D. C., with their four sons, Richard, Scott, Bruce and Robin.

Col. Philip Shepley, USAF-Ret., has received the Commendation Medal for "exceptionally meritorious service" while serving as Deputy AF Representative on the U. N. Military Staff Committee. He plans to live in Italy.

Col. Alfred R. Rauch, USA-Ret., will occupy his new home at 3823 Melgert Lane, Sarasota, Fla. He had been Chief, Plans and Operations Branch G-4 Section, First Army, Governors Island, N. Y. Colonel and Mrs. Rauch have one son, Frank, a First Classman at the U. S. Military Academy.

L/C BEVEL LEADS GEORGIA RETIRED

The Georgia Retired Officers Association has elected **Lt. Col. Roy E. Bevel, AUS-Ret.**, Atlanta, President; **Lt. Col. Raymond M. Peak, USA-Ret.**, Augusta, 1st Vice President; **Lt. Col. James E. Mears, USA-Ret.**, Columbus, 2d Vice President; **Col. Harry D. Simmons, USAF-Ret.**, Athens, Judge Advocate; **Chaplain (Lt. Col.) Charles W. Lovin, USA-Ret.**, Atlanta, Chaplain; **Maj. Wayne E. Bevel, USAF-Ret.**, Marietta, Secretary-Treasurer; **Cmdr. Robert R. Davis, USN-Ret.**, Macon, Director of Public Relations and **Maj. Gen. George G. Finch, USAF-Ret.**, Chairman, State Executive Committee.

Col. John B. Hill, USMC-Ret., was elected President of the Atlanta Metropolitan Retired Officers Association for 1961. **Lt. Col. Raymond M. Peak, USA-Ret.**, Augusta; **Lt. Col. James E. Mears, USA-Ret.**, Columbus; **Cmdr. Robert R. Davis, USN-Ret.**, Macon, and **Adm. J. B. Creagh, USN-Ret.**, Athens.

Maj. Gen. Harry G. Armstrong, USAF-Ret., former AF Surgeon General, with 21 contributing authors, has written "Aerospace Medicine," published by the Williams & Wilkins Company, Baltimore, Md.

Col. Boughner Decorated At Norton AFB Retirement

Col. Kenneth T. Boughner, USAF-Ret., was awarded the Legion of Merit with Oak Leaf Cluster by Maj. Gen. Charles W. Schott, USAF Deputy Inspector General for Inspection, at Norton AFB, Calif. A member of the Directorate of Readiness Inspection, headed by Brig. Gen. William G. Hipps, Colonel Boughner served as Chief of the Transportation Inspection Branch.

Col. Ralph V. Plew, MC, USA-Ret., former Post Surgeon and Commanding Officer of the Army Dispensary at Ft. Hamilton, N. Y., who was Assistant Theater Surgeon in the China-Burma-India WW II campaign, and who completed seven successive years in the Far East, will make his home at 11 Exeter Place, Ardsley, N. Y., with his wife, Hedy.

Col. William E. Kaley, USA-Ret., former Commanding Officer of the Army's Decatur, Ill., Signal Depot, has been succeeded by Lt. Col. Gerald A. Smith, Deputy Commanding Officer. Colonel Kaley is married to the former Frances Ferrel. They have a daughter, Carolyn, who is married to Army Signal Corps Lt. David Pettey.

Colonel Kaley's retirement plans are indefinite at present, but he plans a visit to Florida and to his native Alabama in the immediate future.

Col. William H. Gaeckle, USA-Ret., formerly Deputy Commander of the Army Signal Supply Agency in Philadelphia, plans a six-month tour of Europe with Mrs. Gaeckle. He will return to college to complete his work for a Master's degree in Education at Duke University in preparation for a new career as a teacher of mathematics.

Col. and Mrs. Charles Pirie Law, USA-Ret., have purchased a home at 1311 Olino Street, Honolulu 18, Hawaii. Colonel Law retired 31 May, 1960 at the U. S. Army Finance Center, Ft. Benjamin Harrison, Ind.

Lt. Col. Jack E. Willis, USA-Ret., is serving as Comptroller of Augusta College, Ga., where he and Mrs. Willis and children reside at 996 Highland Avenue.

INDUSTRY IN DEFENSE

AF Officials Are Briefed On Boeing B-52H

PHILIP B. Taylor, second from right, Assistant Air Force Secretary, Materiel, is shown during a visit at Boeing Airplane Company's Wichita, Kans., Division where he received a detailed briefing on the B-52H missile launcher program. Shown here near a turbofan engine-equipped B-52H are, left to right, C. B. Gracey, Boeing Vice President and Wichita Division General Manager; Donald Jackson, Air Force Deputy for Materiel Programs; Col. W. E. Newby, Air Force Plant Representative at Boeing; Secretary Taylor, and R. W. Taylor, B-52 Weapon System Engineering Manager for Boeing.

MOTOROLA NAMES B-70 ELECTRONICS CHIEF

THE Military Electronics Division of Motorola has placed Quentin G. Turner in complete charge of all managerial aspects of development and production of the "Mission and Traffic Control" major weapons system for the North American B-70 supersonic bomber.

Joseph A. Chambers, Vice President and Manager of the Western Center of Motorola's Military Electronics Division, 8201 E. McDowell Road, Scottsdale, Ariz., said Mr. Turner will retain his position as Assistant Manager of Motorola's Western Center.

Under stipulations in the North American Aviation award to Motorola, other prominent electronics firms throughout the nation will be selected to develop portions of the M&T.C. subsystem, which includes several types of aircraft communications equipment, electronic identification units, flight navigational electronics gear and electronic landing aids. Names of the Motorola subcontractor firms will be announced in the near future.

Mr. Turner lives with his wife, Elsie, at 6535 E. Stallion Road, Scottsdale.

\$156 Million Contract Let For '61 Carrier

The Newport News, Va., Shipbuilding and Dry Dock Company has received a contract for \$156.5 million for construction of the conventionally powered aircraft carrier in the Navy's 1961 shipbuilding program.

A Pentagon announcement said the successful proposal received from the Newport News Company was more than \$40 million below the Navy estimate for construction in a naval shipyard based on returned costs for carriers completed and nearing completion.

This ship will be an advanced Forrestal-class design, with many of the electronic improvements of the nuclear-powered carrier Enterprise (CVAN-65) including also the automatic landing system and an improved radar system, which will have a greater range than radar equipments in Forrestal-class ships. It will also have the Terrier medium-range missile system with two twin launchers.

The CVA-66 will be the eighth fully modern carrier. Six Forrestal-class aircraft carriers and one nuclear-powered aircraft carrier, the Enterprise, have been previously authorized. The Newport News firm is currently constructing the

Enterprise and has previously completed the Forrestal (CVA-59) and the Ranger (CVA-61).

This will be the first carrier to be built for the Navy since USS Enterprise was authorized in fiscal year 1958. The Navy did not ask for a carrier in FY 1959. It requested a conventionally-powered carrier in FY 1960, which Congress turned down in favor of funds for long lead items for a second nuclear carrier.

Naval Pilot With Goodyear

William J. Wells has joined the Weapons Systems and Forward Projects Planning Department at Goodyear Aircraft Corporation, Akron, it is announced by Chief Engineer E. A. Brittenham, Jr.

A 1947 graduate of the University of Toledo with a Bachelor of Science degree in mathematics, Mr. Wells completed requirements for his Master's Degree at the University of Michigan in 1948. A pilot in the Navy and Marine Corps for four years during WWII, he resides with his wife and two sons at 119 Monroe Avenue, Cuyahoga Falls, Ohio.

Honeywell Makes Group Appointments

Minneapolis-Honeywell Regulator Company has announced four executive appointments in its Industrial Products Group.

Nilsson S. Bassett, Sales Manager of the Industrial Systems Division (IDS) in Beltsville, Md., joins the company's Federal Services Group in Washington. Succeeding him is John O. Paull, Industrial Sales Manager of the Pacific region in Los Angeles. He, in turn, is being succeeded by J. F. Smith, Southwest Region Industrial Sales manager at Dallas. R. E. Harris, District Manager at Tulsa, succeeds Mr. Smith.

Chance Vought Gets Marine Corps Award

The Electronics Division of Chance Vought, Dallas, has received a contract from the Marine Corps for its video correlator, a compact electronic device which significantly increases the effectiveness of radar for aircraft, ships and land bases.

Division officials said the order represents nearly \$100,000 worth of new correlator business.

The Marine Corps will use the video correlators to boost the detection and tracking capabilities of ground based radar units.

"Although similar units have been purchased by the Navy for aircraft radar uses, the Marine Corps contract will represent the first armed services application of the device for ground stations," Benjamin H. Ciscel, General Manager of the Electronics Division, said.

Hiller Aircraft Joins Electric Autolite Co.

Shareholders of Hiller Aircraft Corporation, Palo Alto, Calif., have approved the plan to make the company a subsidiary of the Electric Autolite Company of Toledo, Ohio.

The action calls for 4 1/4 shares of Hiller to be exchanged for one share of the auto and aircraft parts firm. Electric Autolite shareholders already have approved the plan.

Robert H. Davis, president of Electric Autolite, announced Stanley Hiller, Jr., will continue as president of Hiller Aircraft and will also become a director of the Electric Autolite Company.

Big B-70 Data Contract Reinstated With Garrett

A multimillion dollar contract for development and manufacture of a central air data system for the B-70 has been reinstated with The Garrett Corporation's AIRESEARCH Manufacturing Division of Los Angeles by North American Aviation, weapon system contractor.

Richard E. Palmer, AIRESEARCH Division Manager, said the central air data system serves as a highly sensitive nerve center which will feed flight information to the pilot and other systems on the new defense weapon.

AIRESEARCH won the original contract in May, 1959 after an intensive evaluation by North American covering a wide range of technical criteria. After reduction in the B-70 program, the contract was cancelled.

However, with the recent expansion of the B-70 program, AIRESEARCH was reinstated based on its original proposal and progress in the state of the art.

New Iroquois Copter Gets Rucker Trials

The Phase E Test Program began 28 November at the Army Aviation Center, Ft. Rucker, Ala., for the YHU-1B helicopter, latest of Bell's turbine-powered Iroquois Series.

Maj. Lee Wilhelm and CWO Clifford Turvey flew the test ship from Bell's Hurst plant, between Ft. Worth and Dallas, to Ft. Rucker.

Maj. Wilhelm is rotary-wing project officer of the Army Aviation Board's Test Division. Mr. Turvey is a board project pilot and was one of three Army fliers setting international records with the Iroquois this year.

The YHU-1B upcoming tests, formally called Army Phase E Test Program, will embrace three sub-phases.

Phase I will be for pilot indoctrination and will require approximately 50 hours of flight.

Phase II will see continuation of training and limited tactical suitability tests, requiring approximately 150 hours of flight.

Phase III will test for full tactical suitability and will require approximately 100 hours of flight.

Ling-Temco Works On B-70 Honeycomb

Robert McCulloch, Board Chairman of Ling-Temco Electronics, Inc., Dallas, has announced receipt of a "very significant" contract for honeycomb components of the North American B-70 Valkyrie bomber.

Mr. McCulloch said that Ling-Temco's subsidiary, Temco Electronics & Missiles Company, will deliver high quality, low-cost panels to North American in competition with other companies and the panels will be assembled in sections by North American's Los Angeles Division. Follow-on contracts and future employment levels will depend upon Temco's ability to produce better quality at lower cost than its competitors.

AF Captain Joins AMF

Charles S. Hazard, formerly General Superintendent with Republic Aviation Corporation, has joined American Machine & Foundry Company in the newly-created position of manufacturing specialist it is announced by Carter L. Burgess, AMF President in New York City.

A WWII Air Force captain, Mr. Hazard will advise management on the improvement of manufacturing management and production techniques, review capital equipment expenditures, participate in long range facility planning, establish engineering liaison for new product development, and coordinate areas pertaining to quality control, cost control, and value analysis.

General Wyman of Aeronutronics Visits Huntsville

MAJ. Gen. August Schomburg, second from left, CG of the Army Ordnance Missile Command, is shown with General W. G. Wyman, USA-Ret., third from left, and Mr. G. J. Rauchenbach, left, who were briefed on Army missile systems at Redstone Arsenal, Ala. Maj. Gen. John Barclay, AGMC Deputy Commander, is at the right.

General Wyman, a consultant with Aeronutronics Division of the Ford Motor Company, is a former Commander of the Continental Army Command, Ft. Monroe, Va. Mr. Rauchenbach is manager of Ford's Huntsville office.

AF Officers Assigned To GE Defense Systems

Two Air Force officers have been assigned to the General Electric Company's Defense Systems Department in Syracuse, N. Y., for a year's participation in the Air Force's "Training With Industry" program.

Maj. Richard G. Carnright and Capt. Rufus M. Monts 3d came to the Department from assignments at the United States Air Force Academy.

"Training With Industry," arranged by the Institute of Technology, Air University, USAF, this fall placed 59 officers on one-year assignments with 22 organizations throughout the country.

Single Chief Of Staff Concept Poses Problem For President-Elect Kennedy

From first page—

are such powerful House and Senate leaders as Chairman Richard B. Russell of the Senate Armed Services Committee, Chairman Carl Vinson of the House Armed Service Committee and Senator Mike Mansfield (D-Mont.), who is expected to be named Senate Majority Leader succeeding Vice President-elect Lyndon B. Johnson.

The two Armed Services Committee Chairmen—unless efforts should be made to take the matter out of their jurisdiction, as was done by President Eisenhower in his 1953 reorganization plan—will be responsible for Congressional action on the Kennedy proposals. Senator Russell has said he is "leary" of a single Chief of Staff. Chairman Vinson has said it would mean "national suicide."

Senator Mansfield Is Opposed

Senator Mansfield, if he becomes Majority Leader, also will be in a key position to bar Congressional approval of a system which, he has said, "the unhappy experience of other nations warns us not to adopt."

Allied with these leaders would be many others who hold important posts in the Congress and in the present Pentagon Command structure. They include House GOP Whip Leslie C. Arends (Ill.) and Representative Paul J. Kilday (D-Tex.), both ranking members of the House Armed Services Committee; Senator Styles Bridges (R-NH), a ranking member of both the Senate Armed Services and Appropriations Committees; Secretary of Defense Thomas S. Gates, Jr.; Chief of Naval Operations Arleigh Burke, and Army CofS George H. Decker.

Advocates of a single Chief of Staff, on the other hand, may have the best initial opportunity for effectively selling their views to the new Chief Executive.

Their most articulate spokesman is Senator Stuart Symington (D-Mo) who, at the request of the new President-elect, has been surveying the organization and management of the nation's defense structure. The report of his committee (whose members include Clarke Clifford, Thomas K. Finletter, Roswell Gilpatrick, Fowler Hamilton and Marx Leva) is to be delivered to Senator Kennedy before the end of the month.

The work of the Symington group has been focused upon the administration and management of the Defense Department and related defense agencies and organizations. It is principally concerned with such matters as the relationships between civilian and military, Pentagon decision-making, the role of the JCS and the lag-time in the introduction of new weapons.

Will AF Views Prevail?

Some at the Pentagon believe the Symington Committee is too heavily weighted in favor of the Air Force and that the views of that Service may prevail unless President-elect Kennedy or Vice President-elect Johnson (who is one of the best informed Congressional leaders in the area of defense) pick and choose only those recommendations which are most likely to receive a warm reception in the Congress.

Of the six Committee members, three (Symington, Finletter and Gilpatrick) served as Secretary or Under Secretary of the Air Force. Mr. Hamilton is a former member of the JCS Joint Intelligence Staff. Mr. Leva is a former Special Assistant to the Secretary of the Navy and former General Counsel of the Defense Department. Mr. Clifford, who currently is serving as the President-elect's liaison representative with the Eisenhower Administration, was a for-

mer Naval Aide to President Truman.

Senator Symington has said that he favors "a single chief of staff" and that he believes "the Joint Chiefs should not be the operating heads of their respective services." He is supported by another member of the Senate Armed Services Committee, Senator Prescott Bush (R-Conn), who believes there should be "a general staff organization with a single head man." A number of others in both the House and Senate have taken similar stands. None, however, occupies a position of as much authority as those who are opposed to the move.

A recommendation from the Symington group for creation of a single Chief of Staff would, nevertheless, win strong backing from some in Congress and from "outside" organizations and individuals. The Air Force Association has called (THE JOURNAL 10 October) for creation of a "single military service, with one secretariat, one chief of staff, one promotion list."

Before the Navy League and the Association of the U. S. Army would fight any major change in the present JCS organization. The League is unalterably opposed to a single Chief of Staff, and

AUSA has said it sees no "evidence" which would serve to support such a move.

What the Symington Committee will recommend is conjectural, and there is little reason to believe that the report, when it is made later this month, will be released in part or in whole (if, in fact, at all) until the Chief Executive has had time to study the recommendations and decide which proposals he will seek to put into effect.

No matter which course of action he decides upon, the new Commander-in-Chief is certain to encounter opposition.

Small gas turbines soon to surpass piston engines for competitive applications

by Herbert Kunzel, President

Solar Aircraft Company

A Subsidiary of International Harvester Company

The gas turbine engine has made news this year as it has expanded into new and broader applications in the prime mover field. Behind this advance is continuing improvement in design and production. Even more advanced gas turbines will be developed in the next few years. In the small engine class (under 1000 hp) gas turbines will soon surpass overall piston engine performance and cost for competitive applications. They will also retain the inherent advantages of the gas turbine over the reciprocating engine.

One of the major reasons for this prediction is an impressive improvement in gas turbine economy. Previously, fuel consumption and high initial cost have kept the turbine out of all but selected power assignments. Industry and the military both thought the engines too expensive for most applications.

Through constant improvement, however, Solar has been steadily bringing simple cycle, small turbine specific fuel consumption down to an area competitive with piston engines. The fuel consumption of Solar's early 50 hp engines in 1948, for instance, was about 2.25 lb/hp-hr. The 1100 hp Saturn engine, which went into production this year, has the excellent simple-cycle fuel consumption of only .63 lb/hp-hr. Solar's experienced engineers improve life, "producibility," and performance characteristics with each new engine. At the same time, production costs are lowering rapidly.

Another significant advance in Solar turbine development has been the evolution of a unique design philosophy. Most gas turbines fall into one of two extreme categories: 1) Lightweight, high horsepower aircraft turbines, built to be as light as possible (about ¼ to ½ lb/hp), and 2) conventional industrial engines designed along the lines of steam turbines with a ratio of about 10 lb/hp. Both have inherent disadvantages. The aircraft turbines are relatively delicate with consequent problems of frequent overhaul and short life. Massive engine design, on the other hand, involves unnecessary bulk and difficulties with thermal lag and distortion. In either case, inherent advantages of the gas turbine engine are diminished and initial cost is adversely affected.

Solar's approach has been to develop a family of gas turbines that have both long life and light weight. The Saturn engine, with a weight-to-power ratio of 1.1 lb/hp, is heavier and more rugged than aircraft engines but much lighter than the usual industrial gas turbine. Although it is designed for long life, it has no more materials than are necessary to satisfy structural and thermal requirements.

Promising even further improvements in the turbine engine is the combination of Solar with International Harvester Company this year. IH saw the advantage of more power per pound several years ago. Their research and development has stressed performance and much work has been done by them on regenerative cycle turbines to reduce fuel consumption.

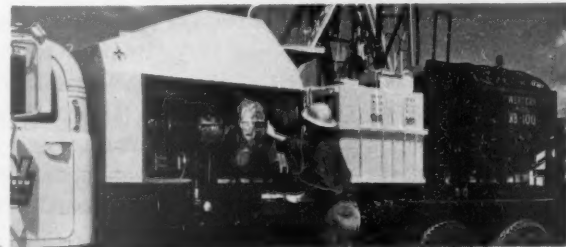

To basic research, they have added their many years of experience and leadership in high performance and low cost through efficient production of many thousands of IH engines for trucks, construction equipment and farm machinery.

Solar's successful Saturn engine development team and the combined research and resources of the two firms are now focused on further engine development in the area below 1100 hp. Preliminary design for a turbine in this range indicates that the following standards are feasible:

1. A life cycle equal to or better than conventional diesel engines—with considerably less maintenance.
2. Fuel consumption in the .4 to .5 lb/hp-hr range.
3. Cost competitive to conventional reciprocating engines.
4. Inherent ease of starting and operation in a wide variety of climatic conditions.
5. Small size and light weight.

Developments like these are certain to continue the increase in turbine applications and use.

For additional information write to Dept. H-306, Solar Aircraft Company, San Diego 12, California.

Saturn engine powering oil well fracturing unit

8th Army Info Chief

Col. Rodger B. Bankson, until recently U.N. Command/US Forces Korea/Eighth Army Information Officer, has returned to the US for assignment with the Armor Training Center, Ft. Knox, Kentucky.

Col. Glaser Will Fill I.G. Intelligence Post

Maj. Gen. Charles W. Schott has announced assignment of Col. Goodlett J. Glaser to the USAF Deputy Inspector General for Inspection, Norton AF Base, Calif., as Chief, Intelligence Branch, Directorate of Readiness Inspection, under Brig. Gen. William G. Hipps.

Colonel Glaser will conduct world-wide surveys of intelligence functions within the Air Force. Since his return from duty with the Office of the Air Attache in Paris, he has been assigned to Headquarters USAF in Washington, D. C.

Capt. Cook Will Get Randolph Command

Capt. Richard E. Harmer will be succeeded by Commanding Officer of the ASW Carrier Randolph (CVS-15) at Portsmouth, Va., by Capt. Harry E. Cook, jr.

Cdr. Robert C. Knight, Executive Officer, will be acting Commanding Officer until the new skipper reports aboard in mid-December.

Captain Harmer will report as CofS to Commander Carrier Division Two which is based aboard the Independence (CVA-62).

B/G Lambert Will Head Construction; Has Held Numerous Nuclear Assignments

Brig. Gen. James B. Lampert will become Director of Military Construction in the Office of the Chief of Engineers in January.

He will succeed Brig. Gen. Clarence Renshaw, who is retiring.

General Lampert, 46, is Deputy Chief for Logistics and Administration, MA-AG, Vietnam. He went to Vietnam in 1958 after attending the National War College in Washington, D. C.

From 1952 to 1957 he served in the dual assignment of Special Assistant to the Chief of Engineers for Nuclear

Power, and Chief of the Army Reactors Branch in the Atomic Energy Commission. From 1950 to 1952 he was head of the Arkansas-White-Red Rivers Inter-Agency Office, Corps of Engineers. In the preceding year he was District Engineer, Charleston, S. C. Earlier he served with the Manhattan Project in 1946 as Executive Officer to Lt. Gen. Leslie R. Groves, the officer who organized and conducted that project for the Chief of Engineers. He then served two years as Special Assistant to Maj. Gen. K. D. Nichols, Chief of the Armed Forces Special Weapons Project.

General Lampert, USMA '36, received his Master of Science degree in Civil Engineering from the Massachusetts Institute of Technology in 1939. He is married to the former Margery Mitchell. They have three children.

ARMY REPORTS "UNLISTED" NAME

Army officials this week advised THE JOURNAL that the 2 December Special Orders would include the promotion to temporary colonel of an officer whose name inadvertently was omitted from the 1959 list of selections.

He is William R. Bond, Infantry.

Army authorities explained that through a clerical error Lieutenant Colonel Bond's name was omitted from "secondary zone" consideration by the 1959 selection board. It so happened that another William R. Bond had been promoted to colonel previously, and as a result the Army related in a "once in a million" happenstance Lieutenant Colonel Bond's name was omitted from consideration.

The list of colonel selections released in October 1959 thus did not contain his name. He had not been considered, although eligible.

When the error was discovered by the board which met this July, his name was considered on the same basis as the 1959 selections were made. It was determined that he would have been selected had the clerical error not been made.

The board recommended his promotion. It was approved by the Secretary of the Army and the President, and his name was placed on the 1959 list at the appropriate seniority spot.

Happily, because his was a "secondary zone" selection, Lieutenant Colonel Bond (Colonel Bond as of 2 December) will lose no numbers nor loss of a day's pay because of the error.

Former USMA Gymnast Will Get AEC Post

From first page—

of 35 he was made Associate Director of the Los Alamos Scientific Laboratory.

He was the first Engineer of the newly-created Army Ballistic Missile Agency at Huntsville, Ala., in 1956, and later was Military Advisor and Military Executive to the Special Assistant and Executive Assistant to the Secretary of Defense for Guided Missiles.

From 1949 to 1951, General Betts served as Chief of the Atomic Energy Branch of the R&D Division of the Office of the Assistant Chief of Staff, G-4, and from 1952 to 1954 was Executive to the Chief of R&D in the Office of the Army Chief of Staff.

Among his other accomplishments: at West Point, General Betts was captain of the gym team, intercollegiate all-around and high bar champion.

MDW Tops Goal Drive

The Military District of Washington exceeded by 20.5% its goal in the United Givers Fund Drive, it is reported by Lt. Col. Stanley J. Sawicki, Deputy Adjutant General, and campaign chairman.

The goal was \$26,000; cash and pledges were \$31,349.74.

WHATEVER THE WEATHER

the Ryan AN/APN-97 Doppler Navigator for helicopters continuously and automatically detects and displays drift, vertical and heading speeds.

By providing sustained automatic hovering and all-weather capabilities, it made possible a vital breakthrough in anti-submarine warfare missions.

The first, lightest, self-contained navigator of its kind, the APN-97 is in full production for the Navy, Marines and Coast Guard and is the only Doppler helicopter navigator in world-wide operational use. The APN-97 operates on the approved frequency of 13,300 megacycles and has demonstrated very high accuracy. Applications include:

All-Weather ASW, Rescue, Navigation, Blind Landings, Automatic Hovering, Aerial Surveys, Drone Helicopter Control, Traffic Control. World leader in the field of C-W Doppler navigation, Ryan Electronics is also making significant progress in solving problems essential to the success of future missions into Space.
